

ANNUAL REPORT 2023

a) Chairman's Review

CHAIRPERSON'S REVIEW

For the Year ended December 31, 2023

On behalf of the Board of Directors, it is my privilege to present the Annual Report of Pak Brunei Investment Company Limited for the year ended December 31, 2023, on overall performance of the Company and effectiveness of the role played by the Board of Directors in achieving Company's objectives.

As we reflect on a year of unprecedented challenges, I am immensely proud of the resilience and dedication exhibited by our Company in navigating through the challenges. The Board also extended full support and advice to the management in tackling different strategic and operational challenges faced during the year.

The Company has achieved another year of outstanding performance, proving the effectiveness of our strategies and good governance. The Board's oversight led to the best use of resources, increased transparency and enhanced information sharing.

The year 2023 was marked by geopolitical conflicts and tensions persisting in various regions with negative consequences for economies of the world. Uncertainties stemming from geopolitical tensions, trade disputes and climate related concerns have continued to impact financial markets worldwide. In this volatile environment, our Company remained vigilant, ensuring focus on business and following prudent risk management policies and practices to safeguard our stakeholders' interests. Locally, the economic landscape was affected by continuing twin deficits, high-interest rates and political uncertainty, which posed challenges for businesses and consumers alike. Persistent inflationary pressures and fluctuating exchange rates added to the complexities faced by the financial sector. Despite these headwinds, our Company maintained its commitment to financial stability, providing reliable financial services and support to our valued customers.

The Board has made best possible effort in discharging its primary responsibility of setting the overall strategy of the Company and enhancing its long-term strategic value. The Board ensures that the business of the Company is conducted in an efficient and effective manner within an established framework of effective system of internal controls, robust risk management processes and compliance with regulatory requirements. In the course of discharging its responsibilities, the Board acts in good faith, with due diligence and care,

and in the best interests of the Company and its Shareholders. During this year, the Board held six meetings during the year to review and approve annual business plan, periodic financial statements and other matters requiring Board's attention. The Board committees also held regular sessions to execute their duties assigned under respective terms of references for assisting the Board in the above matters. During the year, the Board performed an in-house performance evaluation of the Board as a whole, its Committees, the Chairman, the MD / CEO and Individual Directors. The overall evaluation of the Board is notably positive, particularly in respect to its composition, expertise, effective risk management, adequate system of internal controls and audit function.

We remain optimistic about the future prospects of Pak Brunei and are committed to upholding the highest standards of corporate governance and ethical conduct, ensuring sustainable growth and value creation for our stakeholders.

Dk Noorul Hayati Pg Julaihi

Chairperson of Board of Directors

March 27, 2024

b) Directors' Report on Unconsolidated Financial Statements for the Year Ended December 31, 2023

DIRECTORS' REPORT

On behalf of the Board of Directors, we are pleased to present the Audited Financial Statements of Pak Brunei Investment Company Limited ("the Company") for the year ended December 31, 2023.

ECONOMIC OUTLOOK

The global economy experienced a continued slowdown in 2023, amid ongoing uncertainties from geopolitical conflicts, persistent supply chain disruptions from aftershocks of the pandemic and widespread inflationary pressures. Despite these challenges, the global growth outlook has become slightly more balanced, due to the monetary tightening measures undertaken by central banks worldwide. Early indicators suggest a quicker-than-anticipated recovery, with inflationary pressures beginning to ease.

Taking these macroeconomic factors into account, the International Monetary Fund (IMF) estimated global growth at 3.1% for 2023 and 2024. For 2024, the IMF adjusted its global growth projection up from the previous forecast of 2.9% in its October 2023 outlook, marking a 0.2% increase. The IMF also estimates headline inflation for 2023 at 6.8%, a decline from its peak in 2022.

Pakistan's economy faced significant challenges both from domestic and external macroeconomic factors, compounded by political unrest and high inflation. These issues contributed to a decline in domestic GDP. However, despite these difficulties, there have been some short-term signs of improvement. The IMF has revised its estimate for negative growth in domestic GDP for FY'23 to -0.2% which is slightly better than previous estimates of -0.5% published in both July and October updates. Persistent high commodity prices and ongoing pressure on the external account have visible impact on the exchange rate and inflation levels. Consequently, annual average inflation rate for FY'23 stood at 29.18%, a significant increase from the 24.5% recorded in FY'22.

In response to the relatively high inflation, the State Bank of Pakistan (SBP) continued to hike the policy rate, increasing it by a cumulative 825 basis points to reach 22.0% in FY23. SBP estimated the GDP of Pakistan at negative 0.2% in FY'23 and kept the projected growth for FY'24 within the range of 2-3%.

Current account balance turned to surplus in December 2023 to reach at US\$ 404 million as against deficit of US\$ 365 million in December 2022. Current account balance is expected to remain in manageable limit due to primary and secondary income balance.

The Pakistan Stock Exchange (PSX) demonstrated remarkable performance, with the benchmark KSE-100 index closing at 62,451 points as of December 29, 2023, compared to 40,420 points as of December 30, 2022. Similarly, market capitalization of PSX settled at Rs. 9,063 billion as of end of December 2023, compared to Rs. 6,501 billion by the end of corresponding last year.

Pakistan's economy is anticipated to be on path of recovery as the result of expected improvements in macroeconomic conditions and political stability. Increased economic activity, reduction in international oil prices, improved availability of agricultural produce and better business confidence will remain key factors in elevating GDP growth projections. SBP has projected domestic growth around 2-3% in FY'24 and inflation at 5-7% by the end of FY'25 whereas IMF has projected Pakistan's GDP to grow by 2.0% in FY'24 and 3.5% in FY'25.

COMPANY'S PERFORMANCE OVERVIEW

During this challenging year, the Company has efficiently optimized its high-quality balance sheet with moderate growth whereas posted significant increase in net profits. In high interest scenario coupled with other economic uncertainties, the Company continued with a prudent approach in deploying funds. Net investments increased by 2.5 times and were recorded at Rs. 158,671 million as on December 31, 2023, compared to Rs. 44,808 million as on December 31, 2022.

Reflecting the quality of advances portfolio and effective risk management practices, the Company has one of the industry's lowest infection ratios. As of December 31, 2023, the Company's Net Infection Ratio was recorded at 0.78%. Additionally, the Company improved its Coverage Ratio to 86.35% by the end of 2023, compared to 56.78% at the end of the previous year.

Positive growth in average earning assets, improved spreads, and effective investment duration management resulted in healthy growth of 74% in net markup income of the Company which stood at Rs. 1,370 million for the year ended December 31, 2023.

Non markup income of the Company witnessed a growth of 93% during the year under review fee income, dividend income and capital gains all increased during the year but

SBP vide BPRD Circular No. 14 dated October 20, 2016 has advised that the requirement in terms of Prudential Regulation G-1 with regards to the applicability of Code of Corporate Governance (CCG) issued by the Securities and Exchange Commission of Pakistan shall not be applicable on DFIs. There has been no deviation from best practices highlighted in the Statement of Compliance with the best practices of Listed Companies (Code of Corporate Governance) Regulations, 2019.

| | |

*On March 22, 2023 Ms. Norakerteni Muhammad became a director on the Board of Directors after receipt of fit and proper clearance from State Bank of Pakistan. She was nominated by the Brunei Investment Agency to replace of Mr. Sofian Mohammad Jani on the Board of Directors.

**On May 17, 2023 Mr. S. M. Aamir Shamim was appointed as Managing Director by the Government of Pakistan in place of Ms. Ayesha Aziz with immediate effect. The fit and proper clearance in this regard was received from State Bank of Pakistan on May 31, 2023. Four Board meetings were held after his appointment, which were duly attended by him.

CHANGE IN DIRECTORS

On March 22, 2023 Ms. Norakerteni Muhammad became a director on the Board of Directors after receipt of fit and proper clearance from State Bank of Pakistan. She was nominated by the Brunei Investment Agency to replace of Mr. Sofian Mohammad Jani on the Board of Directors.

On May 17, 2023 Mr. S. M. Aamir Shamim was appointed as Managing Director by the Government of Pakistan in place of Ms. Ayesha Aziz with immediate effect. The fit and proper clearance in this regard was received from State Bank of Pakistan on May 31, 2023. Four Board meetings were held after his appointment, which were duly attended by him.

BOARD COMMITTEES

The Board has the following committees for providing support in strategic direction and enhanced oversight. The board committees function as per their respective Terms of Reference (TORs) approved by the Board. A brief description of the functions of each subcommittee, is as follows:

Board Audit Committee (BAC):

The Board Audit Committee reviews the adequacy and effectiveness of the Company's internal control environment, including financial and operational controls, accounting systems, and reporting structure. The Committee provides oversight of the Company's Internal Audit function; approves and monitors the progress of the annual audit plan; and ensures that the Internal Audit Function has adequate resources and is appropriately placed within the organization structure to maintain its independence. The BAC also reviews the financial statements and associated matters before recommending them to the Board for approval; as part of this process, the Committee also interacts with the External Auditors of the Company and recommends the appointment of the auditors to the Board. The BAC is also responsible for monitoring the implementation of new accounting standards.

Board Risk Management Committee (BRMC):

The Committee is responsible for oversight and advice to the Board on risk-related matters, including governance, with respect to the Company's risk appetite and profile. The BRMC also ensures the structure and completeness of the Company's internal risk framework in relation to the risk profile, and the development and maintenance of an independent, supportive and proactive risk management culture. The Committee also takes a forward-looking approach to ensure that evolving risks are identified and mitigated.

Board Human Resource and Remuneration Committee (BHRRC):

The Committee recommends key Human Resources and Remuneration policies including major terms of employment and benefits, Performance Management and Compensation Plans for all key executives and other staff members. It also reviews and recommends policies for staff training, career development and succession planning in line with relevant regulatory requirements and best practices.

MEETINGS OF THE BOARD COMMITTEES

| Name | Audit Committee | | HR&R Committee | | CRM Committee | |
|---------------------------------|-----------------|------------|----------------|------------|---------------|------------|
| | Meetings held | Attendance | Meetings held | Attendance | Meetings held | Attendance |

^{*}On March 22, 2023 Ms. Norakerteni Muhammad became a director on the Board of Directors after receipt of fit and proper clearance from State Bank of Pakistan. She was nominated by the Brunei Investment Agency to replace of Mr. Sofian Mohammad Jani on the Board of Directors.

DIRECTORS' REMUNERATION

The Company has a policy for Directors' Remuneration. The policy is in line with the Prudential Regulations G-1 and / or BPRD Circular No. 03 of 2019 issued by the SBP.

^{**}On May 17, 2023 Mr. S. M. Aamir Shamim was appointed as Managing Director by the Government of Pakistan in place of Ms. Ayesha Aziz with immediate effect. The fit and proper clearance in this regard was received from State Bank of Pakistan on May 31, 2023.

BOARDS' PERFORMANCE EVALUATION

The Board has approved a formal process for the performance evaluation to be carried out on an annual basis. In this regard, an in-house approach has been adopted and quantitative techniques are implemented wherein scored questionnaires are used for Board evaluation. A scoring scale has been established in accordance with SBP guidelines. Furthermore, performance evaluations of the Board, its committees and individual directors are also conducted, facilitated by an external independent evaluator, at least every three years.

The scope covers evaluation of the full Board, individual Directors, Board Committees, the Chairman and the Managing Director. Final results of the annual evaluation are compiled and presented to the Board of Directors which it reviews to identify issues, weaknesses and challenges along with discussing an action plan as to how these can be adequately addressed. Recommendations from the evaluation exercise form the basis of the action plan which is agreed by the Board for implementation. Any areas of improvement identified during the evaluation are noted for appropriate action.

INTERNAL CONTROL OVER FINANCIAL REPORTING (ICFR)

The Board of Directors hereby endorses the management's evaluation related to ICFR and overall Internal Controls.

RISK MANAGEMENT FRAMEWORK

During the course of the year, the Company continued to further strengthen its risk management framework which has been developed over the years and continues to be refined and improved.

Credit risk is managed through the policies approved by the Board. These encompass a well-defined credit approval mechanism, use of internal risk ratings, prescribed documentation requirements, post-disbursement administration, monitoring of credit facilities as well as continuing assessment of credit worthiness of borrowers through periodic reviews. Credit Risk Management also established a mechanism for back testing of the credit scoring model which will be refined going forward. Decisions regarding the credit portfolio are taken by the Credit Committee. Credit Risk Management Committee of the Board provides overall guidance in managing the Company's credit risk. Significant

risk issues are regularly reviewed to determine their impact on the Company's strategy as well as its subsidiaries given that Credit Risk Management is a shared function.

Market risk and Operational risks are managed through respective policies approved by the Board. In addition, the liquidity risk policy provides guidance in managing the liquidity position of the Company, which is monitored on a daily basis. Credit Risk Management Committee of the Board provides overall guidance in managing the Company's market and liquidity risks, capital adequacy, and integrated risk management all of which are covered under the Enterprise Risk Management function. Assessment of enterprise-wide integrated risk profile of the Company is carried out using the Basel Framework, Internal Capital Adequacy Assessment Process, and Stress Testing.

CORPORATE SOCIAL RESPONSIBILITY

Pak Brunei remains committed towards proactive contributions to society. Throughout the year, it has undertaken a series of Corporate Social Responsibility (CSR) initiatives. Emphasizing an agile and professional work environment, the Company aims to augment gender diversity and uphold principles of equal opportunity. Another key focus is fostering environmental sustainability through green practices and tree plantations. These activities demonstrate the Company's dedication to promoting socially responsible citizenship.

APPOINTMENT OF AUDITORS

The Auditors, M/s Yousuf Adil, Chartered Accountants, as the statutory auditor of the Company, have completed their assignment for the year ended December 31, 2023 and being eligible have offered themselves for reappointment. Therefore, the Board on the recommendation of the Audit Committee recommends the appointment of M/s Yousuf Adil, Chartered Accountants as statutory auditors of the Company for the year ending December 31, 2024.

PATTERN OF SHAREHOLDING

| Shareholder | Shareholding (%) |
|--|------------------|
| Ministry of Finance – Govt. of Pakistan | 49.99933% |
| Brunei Investment Agency | 50.00000% |
| Secretary, Economic Affairs Division-Govt. of Pakistan | 0.00067% |

DIVIDEND AND APPROPRIATION

Keeping in view the financial results of the Company, the Board of Directors of the Company has declared a final cash dividend @ 5% i.e., Re. 0.50 per share for the shareholders of the Company, in its meeting held on March 27, 2024. This is to be approved by shareholders in upcoming Annual General Meeting of the Company.

SUBSEQUENT EVENT

There have not been any material events that occurred subsequent to the date of the Statement of Financial Position that require adjustments to the attached financial statements.

EARNING PER SHARE

Basic and Diluted (loss) /earnings per share have been disclosed in note 33 of the financial statements.

FUTURE OUTLOOK

The global economy is displaying indications of recovery as risks concerning future outlook are gradually diminishing. As a result, the IMF has revised its estimate of global growth at 3.1% in January 2024, marking an increase of 0.2% from the earlier estimate made in October 2023. Furthermore, the IMF has projected a decrease in global inflation to 5.8% in 2024 and 4.4% for 2025. On the domestic front, improvements in political and macroeconomic conditions are anticipated. The IMF has projected GDP to grow by 2.0% in FY'24 and 3.5% in FY'25. Similarly, SBP has forecasted domestic growth to be around 2-3% in FY'24 with inflation expected to range between 5-7% by the end of FY'25.

ACKNOWLEDGEMENT AND APPRECIATION

We appreciate our shareholders' trust and support – Government of Pakistan and Brunei Investment Agency – for their continued guidance and support. We appreciate the role State Bank of Pakistan and Securities & Exchange Commission of Pakistan continue to play in regulating the financial markets of Pakistan while providing us with an accommodating operating environment supportive of our unique business strategy.

We also acknowledge and appreciate the cooperation and valuable support of our employees, stakeholders, financial institutions and members of the Board of Directors. We at Pak Brunei Investment Company Limited, are proud of our commitment to excellence in quality of our services and providing value added solutions to our customers at all times.

INDEPENDENT AUDITOR'S REVIEW REPORT TO THE MEMBERS OF PAK-BRUNEI INVESTMENT COMPANY LIMITED

Review Report on the Statement of Compliance contained in Listed Companies (Code of Corporate Governance) Regulations, 2019

We have reviewed the enclosed Statement of Compliance with the best practices of The Listed Companies (Code of Corporate Governance) Regulations, 2019 (the Regulations) prepared by the Board of Directors of Pak Brunei Investment Company Limited (the Company) for the year ended December 31, 2023 in accordance with the requirements of the Regulations to the extent as adopted by the Company.

The responsibility for compliance with the Regulations (as adopted) is that of the Board of Directors of the Company. Our responsibility is to review, to the extent where such compliance can be objectively verified, whether the Statement of Compliance reflects the status of the Company's compliance with the provisions of the Regulations (as adopted) and report if it does not and to highlight any non-compliance with the requirements of the Regulations (as adopted). A review is limited primarily to inquiries of the Company's personnel and review of various documents prepared by the Company to comply with the Regulations (as adopted).

As a part of our audit of the financial statements we are required to obtain an understanding of the accounting and internal control systems sufficient to plan the audit and develop an effective audit approach. We are not required to consider whether the Board of Directors' statement on internal control covers all risks and controls or to form an opinion on the effectiveness of such internal controls, the Company's corporate governance procedures and risks.

The Regulations (as adopted) require the Company to place before the Audit Committee, and upon recommendation of the Audit Committee, place before the Board of Directors for their review and approval, its related party transactions and also ensure compliance with the requirements of Section 208 of the Companies Act, 2017. We are only required and have ensured compliance of this requirement to the extent of the approval of the related party transactions by the Board of Directors upon recommendation of the Audit Committee.

Based on our review, nothing has come to our attention which causes us to believe that the Statement of Compliance does not appropriately reflect the Company's compliance, in all material respects, with the requirements contained in the Regulations as adopted by the Company for the year ended December 31, 2023. We draw attention to the following matters described in the enclosed Statement:

The Regulations are not applicable on Development Financial Institutions (DFIs) vide BPRD Circular No. 14 dated October 20, 2016 issued by the State Bank of Pakistan. However, the Company has voluntarily adopted certain provisions of the Regulations as mentioned in the enclosed statement.

The engagement partner on the review resulting in this independent auditor's review report is Hena Sadiq.

Statement of Compliance with Listed Companies (Code of Corporate Governance) Regulations, 2019

Pak Brunei Investment Company Limited Year ended December 31, 2023

SBP vide BPRD Circular No. 14 dated October 20, 2016 has advised that the requirement in terms of Prudential Regulation G-1 with regards to the applicability of Code of Corporate Governance (CCG) issued by the Securities and Exchange Commission of Pakistan shall not be applicable on DFIs. However, it is expected that all DFIs will continue to follow the best practices on corporate governance. Accordingly, the Company has adopted certain provisions of the Listed Companies (Code of Corporate Governance) Regulations, 2019 (the 'Regulations'), as applicable.

Accordingly, the Statement of Compliance prescribed by SECP as given below has been adjusted to the extent the same has been adopted by the Company.

The total number of directors are four (4) as per the following-

a. Male:

02

b. Female:

02

2. As per the joint venture arrangement between Government of Pakistan (GoP) and Government of Brunei, the Company's board of directors comprises of four directors who are nominated by both the Governments. At present, the composition of Board is as follows:

| Category | Names | Description |
|----------------------------|---|---|
| Executive Director | Mr. S. M. Aamir Shamim | Nominated by the Government of Pakistan |
| Non-Executive Directors | Ms. Dk Noorul Hayati Pg Julaihi (Chairperson) | Nominated by the Government of Brunei |
| | Mr. Nasir Mahmood Khosa | Nominated by the Government of Pakistan |
| | Ms. Norakerteni Muhammad | Nominated by the Government of Brunei |

The Company has obtained relaxation from the State Bank of Pakistan in respect of the appointment of one independent director on the Board.

Given that the directors are appointed by their respective governments, the company can fulfill the requirements necessary to constitute Board committees as stipulated in the Regulations to a certain extent only.

The directors have confirmed that none of them is serving as a director on more than seven listed companies, including this company.

- 3. The Company has prepared a code of conduct and has ensured that appropriate steps have been taken to disseminate it throughout the company along with its supporting policies and procedures.
- 4. The Board has developed a vision/mission statement, overall corporate strategy and significant policies of the company. The Board has ensured that complete record of particulars of the significant policies along with their date of approval or updating is maintained by the Company.
- 5. All the powers of the Board have been duly exercised and decisions on relevant matters have been taken by the Board/shareholders as empowered by the relevant provisions of the Act and the Regulations.
- 6. The meetings of the Board were presided over by the Chairman and, in his absence, by a director elected by the Board for this purpose. The Board has complied with the requirements of Act and the Regulations with respect to frequency, recording and circulating minutes of meeting of the Board.
- The Board have a formal policy and transparent procedures for remuneration of directors in accordance with the Act and these Regulations.
- 8. The Board meets the criteria of requirement of Directors' Training program.

9. Explanation for non-compliance with requirement of Regulation 32(7) is given below;

The delay in furnishing the management letter to the Board within the stipulated 45-day period was due to circumstances beyond our control. Specifically, the external auditors issued the management letter after the lapse of the specified timeframe.

- 10. The Board has approved appointment of Chief Financial Officer, Company Secretary and Head of Internal Audit, including their remuneration and terms and conditions of employment and complied with relevant requirements of the Regulations;
- 11. Chief Financial Officer and Chief Executive Officer duly endorsed the financial statements before approval of the Board;
- 12. The Board has formed committees comprising of members given below.-

| Name of Director | Category |
|--|---------------------------------|
| a) Audit Committee | |
| Mr. Nasir Mahmood Khosa Ms. Dk Noorul Hayati Pg Julaihi Ms. Norakerteni Muhammad | Chairman Member Member |
| b) Human Resource and Remuneration Committee | |
| Ms. Dk Noorul Hayati Pg Julaihi Mr. Nasir Mahmood Khosa Ms. Norakerteni Muhammad | Chairperson Member Member |
| c) Risk and Credit Management Committee | |
| Mr. Nasir Mahmood Khosa Ms. Dk Noorul Hayati Pg Julaihi Mr. S. M. Aamir Shamim | Chairman Member Member |

- 13. The terms of reference of the aforesaid committees have been formed, documented and advised to the committee for compliance;
- 14. The frequency of meetings (quarterly / half yearly / yearly) of the committee were as per following:

| S.No. | Name of the Committee | Frequency of the meetings held during the year | | | | |
|-------|--|--|--|--|--|--|
| 1. | Audit Committee | Four times during the prior year for the approval of the quarterly, half-yearly and annual financial statements of the Company by the Board. | | | | |
| 2. | Human Resource and Remuneration Committee | Twice during the year | | | | |
| 3. | Risk and Credit Management Committee | Twice during the year | | | | |

- 15. The Board has set up an effective internal audit function who are considered suitably qualified and experienced for the purpose and are conversant with the policies and procedures of the Company;
- 16. The statutory auditors of the Company have confirmed that they have been given a satisfactory rating under the Quality Control Review program of the Institute of Chartered Accountants of Pakistan and registered with Audit Oversight Board of Pakistan, that they and all their partners are in compliance with International Federation of Accountants (IFAC) guidelines on code of ethics as adopted by the Institute of Chartered Accountants of Pakistan and that they and the partners of the firm involved in the audit are not a close relative (spouse, parent, dependent and non-dependent children) of the chief executive officer, chief financial officer, head of internal audit, company secretary or director of the Company;

- 17. The statutory auditors or the persons associated with them have not been appointed to provide other services except in accordance with the Act, these Regulations or any other regulatory requirement and the auditors have confirmed that they have observed IFAC guidelines in this regard;
- **18.** We confirm that all requirements of regulations 3, 7, 8, 32, 33 and 36 of the Regulations have been complied with other than the exception noted in paragraph 9 above.

INDEPENDENT AUDITOR'S REPORT

To the members of Pak Brunei Investment Company Limited

Report on the Audit of the unconsolidated financial statements

Opinion

We have audited the annexed unconsolidated financial statements of Pak Brunei Investment Company Limited ('the Company'), which comprise the unconsolidated statement of financial position as at December 31, 2023, the unconsolidated statement of profit and loss account, the unconsolidated statement of comprehensive income, the unconsolidated statement of changes in equity and the unconsolidated cash flow statement for the year then ended, along with notes to the unconsolidated financial statements, including a summary of material accounting policy information and other explanatory information and we state that we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of the audit.

In our opinion and to the best of our information and according to the explanations given to us, the unconsolidated statement of financial position, the unconsolidated statement of profit and loss account, the unconsolidated statement of comprehensive income, the unconsolidated statement of changes in equity and the unconsolidated cash flow statement together with the notes forming part thereof conform with the accounting and reporting standards as applicable in Pakistan, and, give the information required by the Companies Act, 2017(XIX of 2017), in the manner so required and respectively give a true and fair view of the state of the Company's affairs as at December 31, 2023 and of the profit, the comprehensive income, the changes in equity and its cash flow for the year then ended.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the 'Auditor's Responsibilities for the Audit of the Unconsolidated financial statements' section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants' as adopted by the Institute of Chartered Accountants of Pakistan (the Code) and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other than the unconsolidated financial statements and Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the information included in the Director's report for the year ended December 31, 2023, but does not include the unconsolidated financial statements and our auditor's report thereon.

Our opinion on the unconsolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the unconsolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the unconsolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we concluded that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regards.

Yousuf Adil Chartered Accountants

Responsibilities of Management and the Board of Directors for the unconsolidated financial statements

Management is responsible for the preparation and fair presentation of the unconsolidated financial statements in accordance with accounting and reporting standards as applicable in Pakistan, the requirements of the Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of unconsolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the unconsolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the unconsolidated financial statements

Our objectives are to obtain reasonable assurance about whether the unconsolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these unconsolidated financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the unconsolidated financial statements, whether due
 to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
 is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement
 resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional
 omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the unconsolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the unconsolidated financial statements, including the
 disclosures, and whether the unconsolidated financial statements represent the underlying transactions and
 events in a manner that achieves fair presentation.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide to the Board of Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

Based on our audit, we further report that in our opinion:

- a) proper books of account have been kept by the Company as required by the Companies Act, 2017 (XIX of 2017);
- b) the unconsolidated statement of financial position, the unconsolidated statement of profit and loss account, the unconsolidated statement of comprehensive income, the unconsolidated statement of changes in equity and the unconsolidated cash flow statement together with the notes thereon have been drawn up in conformity with the Companies Act, 2017(XIX of 2017) and are in agreement with the books of account;
- c) investments made, expenditure incurred and guarantees extended during the year were for the purpose of the Company's business; and
- d) No zakat was deductible at source under the Zakat and Ushr Ordinance, 1980 (XVIII of 1980).

Other matter

The annual unconsolidated financial statements of the Company for the year ended December 31, 2022 was audited by another firm of Chartered Accountants who through their report dated April 13, 2023 expressed an unqualified opinion thereon.

The engagement partner on the audit resulting in this independent auditor's report is Hena Sadiq.

The annexed notes 1 to 46 and annexure I form an integral part of these unconsolidated financial statements.

President / Chief Executive

Chief Financial Officer

Divostor

Director

1 STATUS AND NATURE OF BUSINESS

Pak Brunei Investment Company Limited (the Company) is a Development Finance Institution (DFI) which was incorporated in Pakistan as an unlisted public limited company on November 28, 2006 under the repealed Companies Ordinance, 1984 (now Companies Act, 2017). The State Bank of Pakistan (SBP) granted the approval for commencement of business with effect from August 20, 2007. The Company is a joint venture between the Government of Pakistan (GoP) and the Brunei Investment Agency (BIA). The Company's objectives interalia include making investments in the industrial and agro-based industrial fields in Pakistan on a commercial basis through carrying out industrial and agro-based industrial projects and marketing of their products in Pakistan and abroad and to undertake other feasible business and to establish and acquire companies to conduct various businesses. The registered office of the Company is situated at Horizon Vista, Plot no. Commercial 10, Block 4, Scheme 5, Clifton, Karachi, Pakistan. The Company is in operation with 2 offices (2022: 2) one located in Karachi and the other in Lahore.

2 BASIS OF PRESENTATION

2.1 These unconsolidated financial statements have been prepared in conformity with the format of financial statements prescribed by the State Bank of Pakistan (SBP) vide BPRD Circular No. 02 of 2023 dated February 09, 2023 effective from the accounting year ending December 31, 2023..The implementation of the revised forms has resulted in certain changes to the presentation and disclosures of various elements of the financial statements. Right of use assets and corresponding lease liability are now presented separately on the face of the Statement of financial position. Previously these were presented under property and equipment (previously titled fixed assets) and other liabilities respectively. There is no financial impact of this change on the financial statements.

Further SBP vide through BPRD Circular letter No.7 of 2023 dated April 13, 2023 deferred the implementation of IFRS-09 and format of financial statements till January 01, 2024 with option of early adoption. The Company has opted to adopt IFRS-09 in the current year and therefore has also opted to prepare these unconsolidated financial statements in the revised format.

2.2 Statement of compliance

These unconsolidated financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards comprise of:

- International Financial Reporting Standards (IFRSs) issued by the International Accounting Standards Board (IASB) as are notified under the Companies Act, 2017;
- Provisions of and directives issued under the Banking Companies Ordinance, 1962;
- Provisions of and directives issued under the Companies Act, 2017; and
- Directives issued by the State Bank of Pakistan (SBP) and the Securities and Exchange Commission of Pakistan (SECP).

Whenever the requirements of the Banking Companies Ordinance, 1962, the Companies Act, 2017, or the directives issued by the SBP and the SECP differ with the requirements of IFRSs, the requirements of the Banking Companies Ordinance, 1962, the Companies Act, 2017 and the said directives shall prevail.

2.3 The SBP through its BSD Circular letter No. 11 dated September 11, 2002 has deferred the implementation of IAS 40 'Investment Property' for Non-Banking Financial Institutions (NBFIs) in Pakistan.

The Company has adopted IFRS 9 Financial Instruments from January 01, 2023 and the detail of the first time adoption is disclosed in note 4. Securities and Exchange Commission of Pakistan (SECP) had deferred the implementation of IFRS 07 through SRO 411 (1) / 2008, however adoption of IFRS 9 and new format has included IFRS 7 disclosure in these unconsolidated financial statement therefore the Company has also adopted IFRS 7 from January 01, 2023.

- Standards and amendments to the accounting and reporting standards that are effective in the current year: 2.4
- There are certain new and amended standards, interpretations and amendments that are mandatory for the Company's 2.4.1 accounting periods beginning on or after January 1, 2023 but are considered not to be relevant or do not have any significant effect on the Company's operations and, therefore, not detailed in these unconsolidated financial statements, other than IFRS-09 impact of which have been disclosed in note 4.
 - Amendments to IAS 1 'Presentation of Financial Statements' Disclosure of accounting policies
 - Amendments to IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors' Definition of accounting estimates.
 - Amendments to IAS 12 'Income Taxes' deferred tax related to assets and liabilities arising from a single transaction.
 - Amendments to IAS 12 'Income taxes' International Tax Reform Pillar Two Model Rules.
- 2.5 Standard and amendments to the accounting and reporting standards that are not yet effective:
- The following amendments and standards are only effective for accounting periods, beginning on or after the date mentioned 2.5.1 against each of them. These amendments are either not relevant to the Company's operations or are not expected to have significant impact on the Company's unconsolidated financial statements other than certain additional disclosures.

| Star | ndards, interpretations or amendments | Effective date (annual periods beginning on or after) | |
|------|---|---|--|
| | Amendments to IFRS 16 'Leases' -Clarification on how seller-lessee subsequently measures sale and leaseback transactions | January 01, 2024 | |
| • | Amendments to IAS 1 'Presentation of Financial Statements' - Non-current liabilities with Convents along with Classification of liabilities as current or non-current | January 01, 2024 | |
| | Amendments to IAS 7 'Statement of Cash Flows' and IFRS 7 'Financial instruments disclosures' - Supplier Finance Arrangements | January 01, 2024 | |
| - | Amendments to IAS 21 'The Effects of Changes in Foreign Exchange Rates' - Clarification on how entity accounts when there is long term lack of Exchangeability | January 01, 2025 | |
| | IFRS 17 'Insurance Contracts' (including the June 2020 and December 2021 Amendments to IFRS 17) | January 01, 2026 | |

Other than the aforesaid amendments, the International Accounting Standards Board (IASB) has also issued the following standard which has not been adopted locally by the Securities and Exchange Commission of Pakistan:

- IFRS 1 - 'First Time Adoption of International Financial Reporting Standards'

2.6 Critical accounting estimates and judgments

The preparation of the unconsolidated financial statements in conformity with the accounting and reporting standards as applicable in Pakistan requires the management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and income and expenses. It also requires the management to exercise judgment in the application of its accounting policies. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. These estimates and assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of revision and future periods if the revision affects both current and future periods.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future period if the revision affects both current and future periods. The estimates and judgments that have a significant effect on the unconsolidated financial statements are in respect of the following:

Significant accounting estimates and areas where judgments were made by the management in the application of accounting policies are as follows:

- i) classification, valuation and provisioning of investments (notes 4.2 and 8);
- ii) classification and provisioning against non performing loans and advances (notes 4.2, 4.2.12 and 9 and 31);
- iii) provision for defined benefit plan (notes 4.13 and 36);
- iv) lease liability and right-of-use assets (notes 4.6.2 and 11);
- v) taxation (notes 4.11 and 32);
- vi) assets classified as held-for-sale (notes 15); and
- vii) provision against off balance sheet obligations and contingent liabilities (note 22 and 31).

2.7 Separate financial statements

These unconsolidated financial statements represent the separate financial statements of the Company in which investment in subsidiaries and associates are stated at cost. The consolidated financial statements of the Company and its subsidiaries are presented separately.

3 BASIS OF MEASUREMENT

3.1 Accounting convention

These unconsolidated financial statements have been prepared under the historical cost convention except for the following:

- Non-current assets classified as held for sale are valued at lower of carrying amount and fair value less cost to sell;
- Certain investments are marked to market and carried at fair value;
- Obligation in respect of staff retirement benefit is carried at present value of defined benefit obligation; and
- Lease liability against right-of-use assets is carried at present value of rentals.

3.2 US Dollar equivalent

The US dollar amounts shown in the unconsolidated statement of financial position, unconsolidated statement of profit and loss account, unconsolidated statement of comprehensive income and unconsolidated cash flow statement are provided as additional information solely for the convenience of users of financial statements. For the purpose of conversion to US Dollars, the rate of Rs. 281.74 to US Dollars has been used for 2023 and 2022 as it was the prevalent rate on December 31, 2023.

3.3 Functional and presentation currency

Items included in the unconsolidated financial statements are measured using the currency of the primary economic environment in which the Company operates. These unconsolidated financial statements are presented in Pakistani Rupee which is the Company's functional and presentation currency.

4. MATERIAL ACCOUNTING POLICY INFORMATION

The accounting policies adopted in the preparation of these unconsolidated financial statements are consistent with those of the previous financial year except for those mentioned in note 4.1.1.

The material accounting policies applied in the preparation of these financial statements are set out below. In addition, the Company adopted Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2) from January 01, 2023. The amendments require the disclosure of 'material', rather than 'significant', accounting policies. Although the amendments did not result in any changes to the accounting policies themselves.

4.1 Material accounting policy and financial risk management

4.1.1 Adoption of new forms for the preparation of unconsolidated financial statements

During the period, the SBP, vide its BPRD Circular No. 02 dated February 09, 2023, issued the revised forms for the preparation of financial statements of the Banks / DFIs which are applicable for the periods beginning on or after January 01, 2023 which was subsequently deferred to January 1, 2024. Adoption of new format has been detailed in note 2.1

The Company has adopted the above changes in the presentation and made additional disclosures to the extent applicable to its operations and corresponding figures have been rearranged / reclassified to correspond to the current year presentation.

4.2 IFRS 9 - 'Financial Instruments'

IFRS 9 brings fundamental changes to the accounting for financial assets and to certain aspects of accounting for financial liabilities. To determine appropriate classification and measurement category, IFRS 9 requires all financial assets, except equity instruments to be assessed based on combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics. The adoption of IFRS 9 has also fundamentally changed the impairment method of financial assets with a forward-looking Expected Credit Losses (ECL) approach.

4.2.1 Classification

Under IFRS 9, existing categories of financial assets: Held for trading (HFT), Available for sale (AFS) and Held to maturity (HTM) have been replaced by:

- Financial assets at fair value through profit or loss account (FVTPL)
- Financial assets at fair value through other comprehensive income (FVOCI)
- Financial assets at amortised cost

Under IFRS 9, the accounting for financial liabilities remains largely the same as before adoption of IFRS 9 and thus all financial liabilities are being carried at amortised cost. Financial liabilities can also be designated at FVTPL where gains or losses arising from entity's own credit rating risk relating to are required to be presented in other comprehensive income with no reclassification to the profit or loss account. The Company did not have any financial liability measured at FVTPL.

4.2.2 Business model assessment

The Company determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Company's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- The objectives for the portfolio, in particular, whether the management's strategy focuses on earning contractual revenue, maintaining a particular yield profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;
- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the Company's key management personnel;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed; and
- The expected frequency, value and timing of sales are also important aspects of the Company's assessment. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Company's stated objective for managing the financial assets is achieved and how cash flows are realised.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Company's original expectations, the Company does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Eventually, the financial assets fall under either of the following three business models:

- I) Hold to Collect (HTC) Business Model: Holding assets in order to collect contractual cash flows
- ii) Hold to Collect and Sell (HTC&S) Business Model: Collecting contractual cash flows and selling financial assets
- iii) Other Business Models: Resulting in classification of financial assets as FVTPL

4.2.3 Assessments whether contractual cash flows are solely payments of principal and profit (SPPI)

As a second step of its classification process the Company assesses the contractual terms of financial assets to identify whether they meet the SPPI test. 'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium / discount). The most significant elements of profit within a financing arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Company applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the profit rate is set. In contrast, contractual terms that introduce a more than de minimise exposure to risks or volatility in the contractual cash flows that are unrelated to a basic financing arrangement do not give rise to contractual cash flows that are solely payments of principal and profit on the amount outstanding. In such cases, the financial asset is required to be measured at FVTPL.

4.2.4 Application to the Company's financial assets

Debt based financial assets

Debt based financial assets held by the Company (including; advances, lending to financial institutions, investment in federal government securities, term finance certificates, other private sukuk, cash and balances with treasury banks, balances with other banks, and other financial assets) are measured at amortised cost if they meet both of the following conditions and is not designated as at FVTPL:

- the assets are held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding.

The Company's business model for these financial assets can still be HTC even when sales of these financial assets occur. However, if more than an infrequent number of sales or sale(s) of significant value are / is made, the Company assess whether and how the sales are consistent with the HTC objective. This assessment include the reason(s) for the sales, the expected frequency of sales, and whether the assets that are sold are held for an extended period of time relative to their contractual maturities.

The aforementioned financial assets are measured at FVOCI only if these meet both of the following conditions and are not designated as at FVTPL:

- the asset are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding.

The aforementioned financial assets if held for trading purposes are classified as measured at FVTPL.

In addition, on initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

The application of these policies also resulted in reclassifications and consequent remeasurements of certain amount of investments in PIBs and T-bills held under available for sale portfolio as of December 31, 2022 based on the business model embodied in the Company's pool management practices. Moreover, the Company's investment in sukuk / TFC under available for sale portfolio as of December 31, 2022 have been reclassified as FVOCI if they fail SPPI criteria they should be classified as FVPL. The following table reconciles their carrying amounts as reported on December 31, 2022 to the carrying amounts under IFRS 9 on transition to IFRS 9 on January 01, 2023:

Equity based financial assets

An equity instrument held by the Company for trading purposes is classified as measured at FVTPL. On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investment-by-investment basis. The Company has decided to classify its available for sale equity investment portfolio as of December 31, 2022 as FVOCI on irrevocable basis.

IFRS 9 has eliminated impairment assessment requirements for investments in equity instruments. However, unlisted equity instruments are required to be measured at lower of cost or breakup value till December 31, 2023 under the SBP's instructions. Accordingly the Company has reversed impairment of Rs. 73.460 million on listed equity investment held as at December 31, 2022 and the same has been transferred to deficit on revaluation of investments through remeasurements.

The measurement category and carrying amount of financial assets in accordance with the accounting and reporting standards as applicable in Pakistan before and after adoption of IFRS 9 as at January 1, 2023.

4.2.5 Initial recognition and measurement

Financial assets and financial liabilities are recognised when the entity becomes party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised on trade date, the date on which the Company purchase or sell the asset. Other financial assets and liabilities like advances, lending to financial institutions, deposits etc. are recognised when funds are transferred to the customers' account or financial institutions. However, for cases, where funds are transferred on deferred payment basis, recognition is completed when underlying asset is purchased. The Company will recognise, Due to customer and financial institution balances when these funds reach the Company.

Amortised cost

Financial assets and liabilities under amortised cost category are initially recognised at fair value adjusted for directly attributable transaction cost. These are subsequently measured at amortised cost. An expected credit loss allowance (ECL) is recognised for financial assets in the profit or loss. Interest income / expense on these assets / liabilities are recognised in the unconsolidated statement of profit and loss account. On derecognition of these financial assets and liabilities, capital gain / loss will be recognised in the unconsolidate statement of profit and loss account.

Fair value through other comprehensive income

Financial assets under FVOCI category are initially recognised at fair value adjusted for directly attributable transaction cost. These assets are subsequently measured at fair value with changes recorded in OCI. An expected credit loss allowance (ECL) is recognised for these financial assets in the unconsolidated statement of profit and loss account. Interest / dividend income on these assets are recognised in the unconsolidated statement of profit and loss account. On derecognition of these financial assets, capital gain / loss is recognised in the other comprehensive income.

Fair value through profit or loss

Financial assets under FVTPL category are initially recognised at fair value. Transaction costs are directly recorded in the profit or loss. These assets are subsequently measured at fair value with changes recorded in the unconsolidated statement of profit and loss account. Interest / dividend income on these assets are recognised in the unconsolidated statement of profit and loss account. On derecognition of these financial assets, capital gain / loss is recognised in the unconsolidated statement of profit and loss account. An expected credit loss allowance (ECL) is not recognised for these financial assets.

The Company's revenue recognition policy is consistent with the annual financial statements for the year ended December 31, 2022.

4.2.6 Restructured Loan

All non-performing restructured exposure shall be subject to a cooling-off period of 6 months from the first date of becoming regular in payment. The status of such loans shall be first upgraded to Stage 2 following the same cooling-off period of 6 months before upgrading to Stage 1.

Interest free / below market rate loans to employees

Initial recognition

The company recognise interest free/ below market rate loan to employee at its fair value by discounting the future loan repayments using the rate that the employee would pay to an unrelated lender for a loan with similar conditions and accordingly charging differential to the unconsolidated statement of profit and loss account between nominal value and fair

Subsequent measurement

The company calculates and recognises imputed interest on these loans. Imputed interest represents the forgone interest that employees would have paid if they had borrowed funds from external sources at prevailing market rates. The difference between the actual interest charged, if any and the imputed interest is recognised as interest income by the Company over the term of the loan.

4.2.7 Derecognition

Financial assets

The Company derecognises a financial asset when:

- the contractual rights to the cash flows from the financial asset expire; or
- it transfers the rights to receive the contractual cash flows in a transaction in which either:
- substantially all of the risks and rewards of ownership of the financial asset are transferred; or
- the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers assets recognised in its unconsolidated statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expired. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in the unconsolidated statement of profit and loss account.

4.2.8 Modification

The Company sometimes renegotiates or otherwise modifies the contractual cash flows of financing to its customers. When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset in accordance with IFRS 9, the Company recalculate the gross carrying amount of the financial asset and shall recognise a modification gain or loss in the profit and loss account. The gross carrying amount of the financial asset shall be recalculated as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective profit rate (or credit-adjusted effective profit rate for purchased or originated credit-impaired financial assets). Any costs or fees incurred adjust the carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

4.2.9 Off setting

Financial assets and financial liabilities are only offset and the net amount is reported in the financial statements when there is a legally enforceable right to set-off the recognised amount and the Company intends either to settle on a net basis, or to realise the assets and to settle the liabilities simultaneously.

4.2.10 Financial assets and liabilities

Financial assets and financial liabilities are recognised at the time when the Company becomes a party to the contractual provision of the instrument. Financial assets are de-recognised when the contractual right future cash flows from the asset expires or is transferred along with the risk and reward of the asset. Financial liabilities are de-recognised when obligation specific in the contract discharge, cancel or expire. Any gain or loss on derecognition of the financial asset and liability is recognised in the unconsolidated statement of profit and loss account of the current year.

4.2.11 Derivative financial instruments

Derivative financial instruments are initially recognised at their fair value on the date on which the derivative contract is entered into and are subsequently remeasured at fair value. All derivative financial instruments are carried as asset when fair value is positive and liabilities when fair value is negative. Any change in the value of derivative financial instruments is taken to the unconsolidate statement of profit and loss account.

4.2.12 Overview of the ECL principles

The Company assesses on a forward-looking basis the expected credit losses ('ECL') associated with all advances and other debt financial assets not held at FVTPL, together with letter of credit, guarantees and unutilised financing commitments hereinafter referred to as "Financial Instruments". The Company recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL) as outlined below.

The 12mECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Both LTECLs and 12mECLs are calculated at individual customer level.

The Company has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument. The Company considers an exposure to have significantly increased in credit risk when there is considerable deterioration in the internal rating grade for subject customer. The Company also applies a secondary qualitative method for triggering a significant increase in credit risk for an asset, such as moving a customer / facility to the watch list, or the account becoming forborne. Regardless of the change in credit grades, generally, the Company considers that there has been a significant increase in credit risk when contractual payments are more than 60 days past due. However, for certain portfolios, the Company may rebut 60 DPD presumption based on behavioural analysis of its borrowers. When estimating ECLs on a collective basis for a group of similar assets, the Company applies the similar principles for assessing whether there has been a significant increase in credit risk since initial recognition.

Based on the above process, the Company groups its financial instruments into Stage 1, Stage 2, Stage 3 and purchased or originated credit impaired (POCI), as described below:

- Stage 1: When financial instruments are first recognised, the Company recognises an allowance based on 12mECLs. Stage 1 financial instruments also include facilities where the credit risk has improved and they have been reclassified from Stage 2. The 12mECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Company calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast exposure at default (EAD) and multiplied by the expected loss given default (LGD) and discounted by an approximation to the original effective interest rate (EIR). This calculation is made for all the scenarios.
- Stage 2: When a financial instrument has shown a significant increase in credit risk since origination, the Company records an allowance for the LTECLs. Stage 2 also includes facilities, where the credit risk has improved and the instrument has been reclassified from Stage 3. The mechanics are similar to those explained above, including the use of multiple scenarios, but probability of defaults (PDs) are applied over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original effective interest rate (EIR).

Stage 3:

For financial instruments considered credit-impaired, the Company recognises the lifetime expected credit losses for these instruments. The Company uses a probability of default (PD) of 100% and loss given default (LGD) as computed for each portfolio or as prescribed by the SBP under the prudential regulations which ever is higher.

POCI:

Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and profit / rental is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.

Undrawn financing

When estimating LTECLs for undrawn financings commitments, the Company estimates the expected portion of the financings commitment that will be drawn down over its expected life. The ECL is then based on the present value of the expected shortfalls in cash flows if the financings is drawn down, based on a probability-weighting of the three scenarios. For revolving facilities that include both a financings and an undrawn commitment, ECLs are calculated and presented within other liabilities.

Guarantee and letters of credit contracts

The Company estimates ECLs based on the BASEL driven credit conversion factor (CCF) for Guarantee and letter of credit contracts. The calculation is made using a probability-weighting of the three scenarios. The ECLs related to guarantee and letter of credit contracts are recognised within other liability.

Effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liabilities to the gross carrying amount of a financial asset or to the amortised cost of a financial liability

The calculation of ECLs

The Company calculates ECLs based on a three probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to a Company in accordance with the contract and the cash flows that the Company expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

- PD The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio. PD is estimated based on statistical technique such as Markov's Chain Process Transition Matrix Approach which are based on the Company's internal risk ratings (i.e. from 1 to 12). PDs for Non advances portfolio, the Company has used PDs prescribed by Standard and Poor's (S&Ps) against each risk rating. PDs are then adjusted using Vasicek Model for IFRS 9 ECL calculations to incorporate forward looking information.
- EAD The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and profit, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments. The maximum period for which the credit losses are determined is the contractual life of a financial instrument unless the Company has the legal right to call it earlier. The Company's product offering includes a variety of corporate facilities, in which the Company has the right to cancel and / or reduce the facilities with one day notice. However, in case of revolving facilities, the Company does not limit its exposure to credit losses to the contractual notice period, but, instead calculates ECL over a period that reflects the Company's expectations of the customer behavior, its likelihood of default and the Company's future risk mitigation procedures, which could include reducing or cancelling the facilities.
- LGD The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD.

The discount rate used to discount the ECLs is based on the effective profit rate that is expected to be charged over the expected period of exposure to the facilities. In the absence of computation of the effective profit rate (at reporting date), the Company uses an approximation e.g. contractual rate (at reporting date).

To mitigate its credit risks on financial assets, the Company seeks to use collateral, where possible. The Company considers only those collaterals as eligible collaterals in the EAD calculation which have the following characteristics:

- History of legal certainty and enforceability
- History of enforceability and recovery.

When estimating the ECLs, the Company considers three scenarios (a base case, an upside, a downside). Each of these is associated with different PDs. When relevant, the assessment of multiple scenarios also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure and the value of collateral or the amount that might be received for selling the asset.

Forward looking information

In its ECL models, the Company relies on a range of forward looking information as economic inputs, such as:

- GDP growth
- Consumer price index

Definition of default

The Company defines a financial instrument as in default, which is fully aligned with the definition of credit impaired, when it meets one or more of the following criteria:

The customer is more than 90 days past due on its contractual payments.

Further the following criteria has been determined for assessment of default:

- The Company makes a charge-off or account-specific provision resulting from a perceived decline in credit quality subsequent to the Company taking on the exposure,
- The Company sells the credit obligation at a material credit-related economic loss,
- The Company consents to a distressed restructuring of the credit obligation where this is likely to result in a diminished financial obligation caused by the material forgiveness, or postponement, of principal, interest or (where relevant) fees,
- The Company has filed for the obligor's bankruptcy or a similar order in respect of the obligor's credit obligation to the industry group, and
- The obligor has sought or has been placed in Bankruptcy or similar protection where this would avoid or delay repayment of the credit obligation to the industry group.

4.2.13 Write-offs

The Company's accounting policy under IFRS 9 remains the same as it was under SBP regulations.

4.2.14 The Company has adopted IFRS 9 effective from January 01, 2023 with modified retrospective approach for restatement permitted under IFRS 9. The cumulative impact of initial application of IFRS-9 is Rs. 247.707 million has been recorded as an adjustment to equity at the beginning of the current accounting period. The details of the impacts of initial application are tabulated below:

| | | | | Impact due to: | | | | | | | |

4.3 Cash and cash equivalents

Cash and cash equivalents for the purpose of cash flow statement represent cash in hand, balances with treasury banks, balances with other banks in current and deposit accounts and short-term highly liquid investments with original maturities of three months or less.

4.4 Lendings to / borrowings from financial and other institutions

The Company enters into repurchase agreements (repo) and reverse repurchase agreements (reverse repo) at contracted rates for a specified period of time. These are recorded as under:

(a) Sale of securities under repurchase agreements

Securities sold with a simultaneous commitment to repurchase at a specified future date (repos) continue to be recognised in the unconsolidated financial statements and are measured in accordance with accounting policies for investment securities. The counterparty liability for amounts received under these agreements is included in borrowings. The difference between sale and repurchase price is treated as mark-up / return / interest expense and accrued over the life of the repo agreement using effective interest rate method.

(b) Purchase of securities under resale agreements

Securities purchased with a corresponding commitment to resell at a specified future date (reverse repos) are not recognised in the unconsolidated financial statements as the Company does not obtain control over the securities. Amounts paid under these agreements are included in lendings to financial institutions. The difference between purchase and resale price is treated as mark-up / return / interest income and accrued over the life of the reverse repo agreement using effective interest method.

4.5 Investments in subsidiaries and associates

Investments in subsidiaries and associates are valued at cost less impairment, if any. A reversal of an impairment loss on subsidiaries and associates is recognised to the extent that the increased carrying value does not exceed cost.

Gains and losses on disposal of investments in subsidiaries and associates are included in the unconsolidated statement of profit and loss account in the period in which disposal is made.

4.6 Property and equipment and depreciation

4.6.1 Tangible assets - owned

Operating fixed assets are stated at cost less accumulated depreciation and accumulated impairment losses, if any. Depreciation is charged to the unconsolidated profit and loss account using the straight line method at the rates stated in note 10 after taking into account residual values, if any. The residual values, useful lives and depreciation methods are reviewed and adjusted, if appropriate, at each reporting date. Depreciation is charged from the date when the asset is available for use while no depreciation is charged on the date the asset is disposed of.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be reliably measured. All other repair and maintenance expenditure are charged to the unconsolidated statement of profit and loss account as and when incurred.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gain / loss on disposal of fixed assets is recognised in the unconsolidated statement of profit and loss account in the period in which disposal is made.

4.6.2 Lease liability and right-of-use assets

On initial recognition, right-of-use assets are measured at an amount equal to initial lease liability adjusted for any lease payments made at or before the commencement date, plus any initial costs incurred and an estimate of costs to be incurred to dismantle and remove the underlying asset or the site on which it is located.

Right-of-use assets are subsequently stated at cost less any accumulated depreciation / accumulated impairment losses and are adjusted for any remeasurement of lease liability. The remeasurement of lease liability will only occur in cases where the terms of the lease are changed during the lease tenure.

Right-of-use assets are depreciated over their expected useful lives using the straight-line method. Depreciation on additions (new leases) is charged from the month in which leases are entered into. No depreciation is charged in month in which the leases mature or are terminated.

The lease liabilities are initially measured as the present value of the remaining lease payments, discounted using the interest rate implicit in the lease, or if that rate cannot be readily determined, the Company's incremental borrowing rate.

The lease liability is subsequently measured at amortised cost using the effective interest rate method. The lease liability is also measured to reflect any remeasurement or change in lease terms. These remeasurement of lease liabilities are recognised as an adjustment to the carrying amount of related right-of-use assets after the date of initial recognition.

Each lease payment is allocated between a reduction of the liability and a finance cost. The finance cost is charged to the unconsolidated statement of profit and loss account as financial charges over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

4.6.3 Capital work-in-progress

Capital work-in-progress is stated at cost less accumulated impairment losses, if any. All expenditure connected with specific assets incurred during the installation and construction / development period is carried under this head. These are transferred to the relevant categories of assets as and when assets become available for use.

4.7 Intangible assets and amortisation

Intangible assets are stated at cost less accumulated amortisation and accumulated impairment losses, if any. Intangible assets are amortised using the straight line method at the rate stated in note 12.1. The residual values, useful lives and amortisation methods are reviewed and adjusted, if appropriate, at each reporting date. Amortisation is charged from the date the asset is available for use while no amortisation is charged on the date the asset is disposed of.

Subsequent costs are included in the asset's carrying amounts or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

Gains and losses on disposals, if any, are taken to the unconsolidated statement of profit and loss account in the period in which these arise.

4.8 Impairment

The adoption of IFRS 9 has fundamentally changed the Company's accounting for impairment losses for financial assets from Prudential Regulations issued by SBP with a forward-looking expected credit loss (ECL) approach. IFRS 9 requires the Company to record an allowance for ECL for all financial assets other than debt instruments classified as FVTPL and equity instruments classified as FVTPL or FVOCI.

Impairment of investments in subsidiaries and associates

The Company considers that a decline in the recoverable value of its investments in subsidiaries and associates below their cost may be evidence of impairment. Recoverable value is calculated as the higher of fair value less costs to sell and value in use. An impairment loss is recognised when the recoverable amount falls below the carrying value and is charged to the unconsolidated statement of profit and loss account. Any subsequent reversal of an impairment loss, up to the cost of the investment in subsidiaries and associates is credited to the unconsolidated statement of profit and loss account.

Impairment of non-financial assets (excluding deferred tax)

The carrying amounts of non-financial assets (other than deferred tax asset) are reviewed at each reporting date to determine whether there is any indication of impairment. If such an indication exists and where the carrying value exceeds the estimated recoverable amounts, assets are written down to their recoverable amounts and any resultant impairment losses are recognised immediately in the unconsolidated statement of profit and loss account.

Impairment losses are reversed if there has been a change in the estimate used to determine the recoverable amounts. Such reversals are only made to the extent that the assets' carrying amounts do not exceed the amounts that would have been determined had no impairment loss been recognised.

4.9 Assets classified as held-for-sale

The Company classifies an asset as held-for-sale if its carrying amount will be recovered principally through a sale transaction rather than through continuing use. For this to be the case, the asset must be available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such assets and its sale must be highly probable. For the sale to be highly probable, the appropriate level of management must be committed to a plan to sell the asset (or disposal group), and an active programme to locate a buyer and complete the plan must have been initiated. Further, the asset must be actively marketed for sale at a price that is reasonable in relation to its current fair value. In addition, the sale should be expected to qualify for recognition as a completed sale within one year from the date of classification and actions required to complete the plan should indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

A held-for-sale asset is carried at the lower of its carrying amount and the fair value less costs to sell. Impairment losses are recognised in the unconsolidated statement of profit and loss account for any initial or subsequent write down of the asset to fair value less costs to sell. Subsequent gains in fair value less costs to sell are recognised to the extent these do not exceed the cumulative impairment losses previously recorded. An asset is not depreciated while classified as held for sale.

4.10 Assets acquired in satisfaction of claims

The Company occasionally acquires assets in settlement of certain advances. These are stated at the lower of the net realisable value of the related advances or the fair value of such assets.

4.11 Taxation

Income tax expense comprises charge for current and prior years and deferred tax. Income tax expense is recognised in the unconsolidated statement of profit and loss account except to the extent that it relates to items, recognised either directly in equity or other comprehensive income, in which case it is recognised in equity or other comprehensive income respectively.

4.11.1 Current

Provision for current taxation is based on taxable income at the rate enacted or substantively enacted at the reporting date after taking into account tax credits and rebates available, if any. The charge for the current tax also includes adjustments where necessary, relating to prior years which arise from assessments framed / finalised during the year.

4.11.2 Deferred

Deferred tax is recognised using the liability method on all temporary differences between the amounts attributed to the assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax asset is also recorded on available tax losses and unused tax credits. Deferred tax is calculated at the tax rates that are expected to be applicable to the temporary differences when these reverse based on the tax rates that have been enacted or substantively enacted as at the reporting date.

Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, carry forward of unused tax credits and unused tax losses can be utilised. The carrying amount of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax relating to items recognised in other comprehensive income (OCI) is charged / credited to OCI.

4.12 Borrowings / deposits

Borrowings / deposits are recorded at the time when proceeds are received. The cost of borrowings / deposits is recognised as an expense in the period in which it is incurred using the effective interest rate method.

4.13 Staff retirement benefits

Defined benefit plan - staff gratuity fund

The Company operates a funded gratuity scheme for its eligible permanent employees. The liability recognised in the unconsolidated statement of financial position in respect of defined benefit gratuity scheme, is the present value of the defined benefit obligation as at the reporting date less the fair value of plan assets. Contributions to the fund are made on the basis of actuarial recommendations. The Projected Unit Credit Method is used for actuarial valuations. Valuations are conducted by an independent actuary with the last valuation conducted as at December 31, 2023.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period and recognised as an expense to the unconsolidated statement of profit and loss account. Past service cost is the change in the present value of defined benefit obligation resulting from a plan amendment or curtailment and is recognised as an expense in the unconsolidated statement of profit and loss account when the plan amendment or curtailment occurs. Actuarial gains and losses that arise out of experience adjustments and changes in actuarial assumptions are recognised in other comprehensive income with no subsequent recycling through the unconsolidated statement of profit and loss account.

Defined contribution plan - staff provident fund

The Company operates a provident fund scheme for its employees. Equal monthly contributions are made into the fund both by the Company and the employees at the rate of 10% of basic salary.

4.14 Financial instruments

Financial assets and liabilities carried on the unconsolidated statement of financial position include cash and bank balances, lendings to financial institutions, investments, advances, certain receivables, borrowings from financial institutions, deposits and certain payables. Financial assets and liabilities are recognised at the time when the Company becomes party to the contractual provision of the instrument. Financial assets are de-recognised when the contractual right to future cash flows from the asset expires or is transferred along with the risk and reward of ownership of the asset. Financial liabilities are derecognised when obligation specified in the contract is discharged, cancelled or expired. Any gain or loss on de-recognition of the financial asset and liability is recognised in the unconsolidated statement of profit and loss account in the period in which these are derecognised. The particular recognition and subsequent measurement methods for significant financial assets and financial liabilities are disclosed in the individual policy statements associated with them.

Derivative financial instruments

Derivative financial instruments are initially recognised at fair value on the date on which the derivative contract is entered into and are subsequently re-measured at fair value using appropriate valuation techniques. These are carried as assets when the fair value is positive and liabilities when the fair value is negative. Any change in the fair value of derivative instruments arising during the period is taken to the unconsolidated statement of profit and loss account.

Offsetting

Financial assets and financial liabilities are offset and the net amount is reported in the unconsolidated financial statements only when there is a legally enforceable right to set-off and the Company intends either to settle on a net basis, or to realise the assets and to settle the liabilities simultaneously.

4.15 Provisions, contingent assets and contingent liabilities

Provisions are recognised when the Company has a present, legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

Contingent assets are not recognised and are also not disclosed unless an inflow of economic benefits is probable. Contingent liabilities are not recognised and are disclosed unless the probability of an outflow of resources embodying economic benefits is remote.

4.16 Commitments

Commitments contracted for but not incurred are disclosed in the unconsolidated financial statements at committed amounts.

4.17 Revenue recognition

Revenue is recognised to the extent that the economic benefits associated with the transaction will flow to the Company and the amount can be measured reliably.

- Mark-up / return / interest income on advances and investments is recognised on a time proportion basis taking into account effective yield on the instruments except in case of advances and investments classified as non-performing under the SBP's Prudential Regulations on which mark-up / return / interest is recognised on a receipt basis.
- Dividend income is recognised when the Company's right to receive dividend is established.
- Fee, commission and brokerage income and remuneration for trustee and advisory services are recognised as services are rendered.
- Premium or discount on debt securities is amortised using the effective interest rate method.
- Gains and losses on disposal of assets are recognised in the period in which these arise.
- Return on bank deposits is recognised on a time proportion basis using the effective interest rate method.
- Rental income is recognised on accrual basis.

4.18 Earnings per share

The Company presents basic and diluted earnings per share (EPS) for its shareholders. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares, if any.

4.19 Foreign currency transactions

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing on the dates of transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the unconsolidated statement of profit and loss account.

4.20 Proposed dividends and transfers between reserves

Dividends declared and transfers between reserves made subsequent to the reporting date are considered as non-adjusting events and are recognised in the unconsolidated financial statements in the period in which such dividends are declared / transfers are made.

4.21 Segment reporting

A segment is a distinguishable component of the Company that is engaged either in providing product or services (business segment) or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.

The Chief Executive Officer has been identified as the chief operating decision-maker who is responsible for allocating resources and assessing the performance of the operating segments.

4.21.1 Business segments

Corporate finance

Corporate finance includes services provided in connection with mergers and acquisitions, underwriting, privatisation, securitisation, research, debts (government, high yield corporate bonds, etc.), equity, syndication, initial public offering (IPO) and secondary private placements.

Trading and sales

This includes fixed income, equity, foreign exchange, commodities, credit, funding, lending, repos and brokerage activities.

Commercial banking

Commercial banking includes project finance, real estate, export finance, trade finance, factoring, leasing, lending, guarantees, bill of exchange and deposits.

4.21.2 Geographical segments

The operations of the Company are currently based only in Pakistan.

9.1.1 These leases are executed for a term of 1 to 5 years. Security deposits have been obtained within a range of 10% to 50% (2022: 10% to 30%) of the cost of investment at the time of disbursement and have been recorded in other liabilities. The rate of return ranges from 9.22% to 29.08% per annum (2022: 9.43% to 24% per annum). Lease rentals are receivable in monthly / quarterly / half yearly instalments. The assets are pledged in favor of the Company.

Stage 1 includes loans and advances that have not had a significant increase in credit risk since initial recognition or that have low credit risk at the reporting date. For Stage 1 loans, 12-month expected credit losses ('ECL') are recognised and interest revenue is calculated on the gross carrying amount of the loan amount. 12-month ECL are the expected credit losses that result from default events that are possible within 12 months after the reporting date.

500,622

500,622

In foreign currencies

9.5

Stage 2 includes loans and advances where credit risk is higher since initiation or they have had a significant increase in credit risk since initial recognition but that do not have objective evidence of impairment. For these loans, lifetime ECL are recognised, but interest revenue is still calculated on the gross carrying amount of the loan amount. Lifetime ECL are the expected credit losses that result from all possible default events over the expected life of the loans. Expected credit losses are the weighted average credit losses with the probability of default ('PD') as the weight.

Stage 1 comprises of EAD (principal plus markup) amounting to Rs. 19,405.159 million and ECL of Rs. 58.874 million and stage 2 comprises of EAD amounting to Rs. 434.833 million and ECL of Rs. 19.736 million.

Forced Sale Value (FSV) benefit amounting to Rs. 371.28 million (2022: Rs. 364.074 million) is available with the Company against certain mortgaged properties held as collateral against non-performing advances. However, the same has not been considered while computing credit loss allowance as at year end, as credit loss allowance has been computed under IFRS 9 - Financial Intruments.

| | | | | |

- These represent land, building and machinery which have been classified as 'non-current assets as held for sale' as at December 31, 2021. The Company acquired these assets by settling total outstanding principal and mark-up of Rs 135 million and Rs 34 million respectively. It is expected that the process of sale of these assets will be completed in the near future.
- 15.2 The Board of Directors of the Company has decided to proceed with divestment of its total interest in Awwal Modarab Management Limited (AMML). Accordingly, the Board of Directors of AMML in their meeting held on September 30, 2023 directed to disseminate the significant development to relevant authorities and stakesholders in a timely and transparent manner.

The material information was sent to the Pakistan Stock Exchange (PSX) and Security Exchange Commission of Pakistan (SECP) of Pakistan on September 30, 2023.

On October 12, 2023, invitation for expression of Interest was published in the newspaper for complete acquisition of AMML including management rights of the modaraba.

On November 21, 2023, the Company informed the Registrar Modaraba, SECP about the receipt of bids from various parties. The SECP vide letter dated November 21, 2023, directed to apply to the Registrar Modaraba for the transfer of AMML shares and management rights of the modaraba to the proposed acquirer.

As of the reporting date, the process of evaluation / review of the bids, received by the PBICL, is in progress for selection of one party. After finalisation of the assessment process the matter shall be forwarded to the Registrar Modaraba to seek permission for transfer of AMML shares along with the management rights of the modaraba as advised by SECP.

During the year 2021, the Company has given an advance against right issue to AMML amounting to Rs. 40 million.

The investment in AMML, shares and advance against issue of share, has been classified as assets held for sale. Impairment has been recorded against asset held for sale by comparing cost and estimated fair value.

The Company has paid an advance against right issue to the Awwal Modaraba Management Limited (Subsidiary Company) amounting to Rs 40 million against which shares have not been issued as at December 31, 2023.

- The Company has entered into agreements for financing with the SBP for Long-Term Financing under export oriented projects to customers. According to the terms of the respective agreements, the SBP has the right to receive the outstanding amount from the Company at the due date by directly debiting the current account maintained by the Company with the SBP. The rate of return ranges from 2% to 11% per annum (2022: 2% to 7% per annum). These are secured against demand promissory notes and are repayable within 8 years (2022: 9 years).
- These borrowings have been obtained from the SBP under a scheme for financing renewable energy power plants to promote renewable energy projects in the country. These carry mark-up at rates ranging from 2.00% to 5.00% per annum (2022: 2.00% to 5.00% per annum) and are due to mature latest by June 30, 2029. As per the terms of the agreement, the Company has granted the SBP a right to recover the outstanding amount from the Company at the respective date of maturity of finances by directly debiting the current account of the Company maintained with the SBP.
- These represent borrowings from the SBP under scheme for temporary economic refinance facility. The mark-up rate applicable on these facilities is 1% to 2% per annum (2022: 1% per annum) payable on quarterly basis, with maturities upto May, 2032 (2022: May 2032). As per the terms of the agreement, the Company has granted the SBP a right to recover the outstanding amount from the Company at the respective date of maturity of finances by directly debiting the current account of the Company maintained with the SBP.
- These borrowings have been obtained from the SBP under a scheme for financing the storage of agricultural produce to encourage the private sector to establish silos, warehouses and cold storages. These carry mark-up at rate of 2% to 4% per annum (2022: 2.53% per annum) and are due to be matured by June 02, 2029.

- These represent borrowings from the SBP under scheme for refinance and credit guarantee schemes. The mark-up rate applicable on these facilities is 0% per annum (2022: 0% per annum) payable on quarterly basis, with maturities upto November, 2028 (2022: November, 2027). As per the terms of the agreement, the Company has granted the SBP a right to recover the outstanding amount from the Company at the respective date of maturity of finances by directly debiting the current account of the Company maintained with the SBP.
- 16.7 These represent financing facilities to special persons to meet credit needs for setting up of new business enterprises or for expansion of existing ones and claim refinance from State Bank of Pakistan up to 100% of finance extended by them. The spread is capped at 5% per annum (2022: 5% per annum) by SBP whereas SBP's refinance rate for this facility is 0% per annum (2022: 0% per annum) with maturities upto September 2027. In case of default of the counterparty, upto 60% of principal is covered by SBP. As per the terms of the agreement, the Company has granted the SBP a right to recover the outstanding amount from the Company at the respective date of maturity of finances by directly debiting the current account of the Company maintained with the SBP.
- These represent borrowings from the SBP under scheme for working capital facilities. The mark-up rate applicable on these facilities is 2% per annum (2022: 2% per annum) payable on quarterly basis, with maturities upto May 2028. As per the terms of the agreement, the Company has granted the SBP a right to recover the outstanding amount from the Company at the respective date of maturity of finances by directly debiting the current account of the Company maintained with the SBP.
- These represent borrowings from the SBP under scheme for balancing, modernisation & replacement scheme. The mark-up rate applicable on these facilities is 1% to 2% per annum (2022: 1% to 2% per annum) payable on quarterly basis, with maturities upto June 2029 (2022: April 2028). As per the terms of the agreement, the Company has granted the SBP a right to recover the outstanding amount from the Company at the respective date of maturity of finances by directly debiting the current account of the Company maintained with the SBP.
- 16.10 These represent borrowings from various financial institutions at mark-up rates ranging from 22.07% to 22.11% per annum (2022: 16.09% to 16.10% per annum). Pakistan Investment Bonds and Market Treasury Bills having a face value of Rs. 111,600 million (2022: 10,000 million) and Rs. nil (2022: Rs. 4,000 million) have been given as collateral against these borrowings respectively.
- 16.11 These borrowings carry mark-up at rates ranging from 21.49% to 23.26% per annum (2022: 15.92% to 17.29% per annum) and are repayable within 4 years (2022: 5 years). These are secured against hypothecation of receivables, PIBs having a face value of Rs. 21.39 billion (2022: Rs. 24.98 billion) and floating charge over term finance certificates having a face value of Rs. 699.78 million (2022: 750 million).

22.3.1 In 2009, Burj Bank Limited (formerly Dawood Islamic Bank Limited) filed a legal suit amounting to Rs. 200 million for damages against the Company for alleged non-performance of underwriting commitment in respect of issue of shares at a premium. The

22.3

Other contingent liabilities

- legal advisors of the Company are of the opinion that the Company has a strong case and that the matter will most likely be decided in favor of the Company.

 22.3.2 The returns of income of the Company from tax years 2008 to 2023 had been filed with the tax authorities. From tax year 2008
- up to tax year 2020, these returns have been revised and additional tax demands have been raised of which Rs. 782.07 million are outstanding as at December 31, 2023. The matters which have been raised in these demands mainly included allocation of common expenses to dividend income, taxation of discount income, additions on account of concessional loans to employees and deletion of the charge pertaining to the Workers' Welfare Fund. The Company is contesting these demands and appeals have been filed by the Company against the same which are pending adjudication at various legal and appellate forums. The Company has made partial payments against some of these demands which are being shown as refundable from tax authorities (note 13). The management is confident that the matters will eventually be decided in favor of the Company and that the Company will be able to adjust amounts in respect of matters decided against the Company (if any) against the tax refunds currently being claimed by it.

30.1 As a consequence of the 18th amendment to the Constitution of Pakistan, the Sindh Workers' Welfare Fund Act, 2014 (SWWF Act) had been passed by the Government of Sindh in May 2015 as a result of which every industrial establishment located in the Province of Sindh, the total income of which in any accounting year is not less than Rs. 0.50 million, is required to pay Sindh Workers' Welfare Fund (SWWF) in respect of that year a sum equal to two percent of such income. The matter relating to payment of SWWF is pending before the Sindh High Court and an interim stay order has been granted to the Company. However, as a matter of abundant caution, the management has maintained a provision for SWWF in the unconsolidated financial statements amounting to Rs. 173.682 million which includes a provision of Rs. 24.687 million for the current year.

36 DEFINED BENEFIT PLAN

36.1 General description

As mentioned in note 4.13, the Company operates a funded gratuity scheme for all its permanent employees. The benefits under the gratuity scheme are payable on retirement at the age of 60 or earlier cessation of service, in lump sum. The benefit is equal to one month's last drawn basic salary for each year of eligible service with the Company subject to a minimum qualifying period of service of five years. The plan assets and defined benefit obligations are based in Pakistan.

36.9.1 Description of risks

The defined benefit plan exposes the Company to the following risks:

Withdrawal risks - This is the risk of higher or lower withdrawal experience than assumed. The final effect could go either way depending on the beneficiaries' service / age distribution and the benefit.

Mortality risks - This is the risk that the actual mortality experience is different. Similar to the withdrawal risk, the effect depends on the beneficiaries' service / age distribution and the benefit.

Investment risks - This is the risk of the investment underperformance and being not sufficient to meet the liabilities.

Final salary risks - This is the risk that the final salary at the time of cessation of service is greater than what was assumed.

36.10 Sensitivity analysis

A sensitivity analysis for each significant financial assumption as of the reporting date, showing how the defined benefit obligation would have been affected by changes in the relevant actuarial assumption that were reasonably possible at that date, is as follows:

| | 2023 Rupees ir | 2022 in '000 | |
|---|-------------------|-----------------|--|
| Increase / decrease in obligation | | | |
| 1% increase in discount rate | 3,687 | 4,736 | |
| 1% decrease in discount rate | (4,184) | (5,309) | |
| 1% increase in expected rate of salary increase | (4,179) | (5,358) | |
| 1% decrease in expected rate of salary increase | 3,749 | 4,864 | |

The above sensitivities analyses are based on a change in an assumption while holding all other assumptions constant. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the gratuity liability recognised within the unconsolidated statement of financial position.

Rupees in '000

36.11 Expected contributions to be paid to the fund in the next financial year

9,486

The expected charge for the next financial year commencing January 1, 2024 works out to Rs 9.486 million (2022: 7.033 million).

36.12 Maturity profile

The weighted average duration of the obligation is 8 years (2022: 7.6 years).

36.13 Funding policy

An implicit, though not a formally expressed objective, is that the liabilities under the scheme in respect of members in service on the valuation date on a going concern basis and having regard to projected future salary increases, should be covered by the Fund on the valuation date, the total book reserve as of the valuation date, future contributions to the Fund, future additions to the book reserve and future projected investment income of the Fund.

Accordingly the contribution to the Fund should remain reasonably stable as a percentage of salaries, under the Actuarial Cost Method employed.

37 DEFINED CONTRIBUTION PLAN

The Company operates a provident fund scheme for all its permanent employees. Equal monthly contributions at the rate of 10% per annum (2022: 10% per annum) of basic salaries are made both by the Company and employees. Contributions made to the provident fund during the year are as follows:

| | 2023 | 2022 |
|----------------------------------|--------|---------|
| | Rupees | in '000 |
| Contribution made by the Company | 8,574 | 7,904 |
| Contribution made by employees | 8,574 | 7,904 |
| | 17,148 | 15,808 |

39 FAIR VALUE MEASUREMENT

The fair value of quoted securities other than those classified as held to maturity, is based on quoted market price. Quoted securities classified as held to maturity are carried at cost. The fair value of unquoted equity securities, other than investments in associates and subsidiaries, is determined on the basis of the break-up value of these investments as per their latest available audited financial statements.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments.

39.1 Fair value of financial assets

The Company measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the assets or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: Fair value measurements using input for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

Valuation techniques and inputs used in determination of fair values

| Item | Valuation techniques and input used |
|---|---|
| Fully paid-up ordinary shares | Fair values of investments in listed equity securities are valued on the basis of closing quoted market prices available at the stock exchange. |
| Pakistan Investment Bonds / Market Treasury Bills | Fair values of Pakistan Investment Bonds and Treasury Bills are derived using the PKRV / PKFRVrates (FMA report). |
| | Investments in listed debt securities (comprising term finance certificates, bonds, sukuk certificates and any other security issued by a company or a body corporate for the purpose of raising funds in the form of redeemable capital) are valued on the basis of the prices announced by the Pakistan Stock Exchange Limited. |

The table below analyses financial instruments measured at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorised:

40.2 Segment details with respect to geographical location

The operations of the Company are currently based only in Pakistan.

41 TRUST ACTIVITIES

The Company is acting as Debt Securities Trustee and Investment Agent to Issues of Term Finance Certificates (TFCs), Sukuk and Commercial Papers ("Debt Securities") and is holding Secured Properties in a fiduciary capacity for and on behalf of Investors. The Company is authorised to provide said services under Public Offering (Regulated Securities Activities Licensing) Regulations, 2017 (the "Regulations") of the Securities & Exchange Commission of Pakistan (SECP).

Presently, the Company is acting as Trustee and Investment Agent to 50 (fifty) debt securities issues by institutions namely Agha Steel Industries Limited, Agritech Limited, Azgard Nine Limited, Bank Alfalah Limited, Bank Al-Habib Limited, Bank Islami Pakistan Limited. Crescent Steel & Allied Product Limited, Dubai Islami Bank Pakistan Limited, Habib Bank Limited, Hub Power Company Limited, Hub Power Holding Pvt. Limited, JS Bank Limited, Kashf Foundation Limited, K-Electric Limited, Khushhali Microfinance Bank Limited, Neelum Jhelum Hydro Power Co. Limited, Pakistan Intermodals Limited, Pakistan Services Limited, Silk Bank Limited, Sindh Nooriabad Power Co. Ph. (II) Pvt. Limited (Phase-I & II), Soneri Bank Limited, Summit Bank Limited, Telecard Limited, The Bank of Punjab, U Microfinance Bank Limited, and WAPDA (Dasu Hydro Power Project). The combined value of debt securities as at December 31, 2023 amounted to Rs. 386,774 million (2022: Rs. 404,841 million).

42 RELATED PARTY TRANSACTIONS

The Company has related party relationship with subsidiary companies (namely Primus Leasing Limited, Awwal Modaraba, Awwal Modaraba Management Limited and Awwal Corporate Restructuring Company Limited), First Pak Modaraba, First Prudential Modaraba, KASB Modaraba, KSB Pumps Company Limited, Trade Development Authority of Pakistan, Engro Polymer and Chemicals Limited employees' defined benefit and defined contribution plan, its key management personnel and state controlled entities.

There are no transactions with key management personnel other than those carried out as per their terms of employment. Contributions to approved defined benefit and contribution plans are made in accordance with the actuarial valuations / terms of scheme. Remuneration to executives is disclosed in note 36 to the unconsolidated financial statements. Transactions with owners have been disclosed in 'Unconsolidated Statement of Changes in Equity'. All other transactions between the Company and its related parties are carried out under normal course of business except employee staff loans that are as per terms of employment. However, we understand that there are several transaction with subsidiaries that are based on agreed terms. The details of transactions with related parties during the year and balances with them as at year end, other than those which have been disclosed elsewhere in these unconsolidated financial statements, are as follows:

In order to strengthen the solvency of Banks / Development Financial Institutions (DFI), SBP through its BSD Circular No. 19 of 2008 dated September 05, 2008 has asked the DFIs to raise their minimum paid up capital to Rs.6 billion free of losses by the end of financial year 2009.

The paid-up capital and CAR of the Company stands at Rs. 6 billion and 26.58% of its risk weighted exposure as at December 31, 2023.

The Company uses Standardised approach for calculations of Credit and Market Risk Weighted Assets while Basic Indicator approach is used to calculate Operational Risk Weighted assets.

The link to the full disclosure is available at https://pakbrunei.com.pk/wp-content/uploads/2020/03/BaselIII2020Disclosure-Standalone.pdf

44 RISK MANAGEMENT

The Risk Management Framework (the Framework) of the Company provides principles for identifying, assessing and monitoring risk within the Company. The Framework specifies the key elements of the risk management process in order to maximise opportunities, to minimise adversity and to achieve improved outcomes and outputs based on informed decision making.

Categories of risk

The Company generates most of its revenues by accepting credit, liquidity and market risk. Effective management of these risks is the decisive factor in the profitability of the Company. In addition, the Company is subject to certain consequential risks that are common to all business undertakings. These risks are grouped under two headings: operational risk and reputational risk. The Framework is organised with reference to these five risk categories as detailed below:

| Credit risk | This risk is defined as the possibility of loss due to unexpected default or a deterioration of credit worthiness of a counter party. |
|-------------------|---|
| Market risk | The risk of loss generated by adverse changes in the price of assets or contracts currently held by the Company. |
| Liquidity risk | The risk that the Company is unable to meet its payment obligations or fund increases in assets when they fall due without incurring an unacceptable cost the consequences of which may be the failure to meet obligations to repay investors and fulfil commitments to lend. |
| Operational risk | Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, and systems or from external events and includes legal risk. |
| Reputational risk | The risk of failing to meet the standards of performance or behaviour required or expected by stakeholders in commercial activities or the way in which business is conducted. |

Risk responsibilities

The Board of Directors (the Board) is accountable for the overall supervision of the risk management process. The Board is responsible for the approval of all risk policies and ensuring that these are properly implemented. Furthermore, the Board approves the appointment of senior management personnel who are capable of managing the risk activities conducted by the Company.

Risk Management comprises of two areas namely Credit Risk Management (CRM) and Middle Office and Operational Risk (MOOR). CRM oversees credit risk taken by the Company while MOOR function overviews market, liquidity and operational risks of the Company. The functions of both of these units are subject to the policies and manuals approved by the Board, Prudential Regulations and additional regulatory directives issued from time to time. These units are independent of business generation and risk taking. For all credit exposures taken by the Company, CRM prepares a comprehensive credit advice highlighting business, financial and structural risks for Credit Committee members. CRM monitors the credit portfolio of the Company on a regular basis to ensure prudent lending. Moreover, this department also sets parameters for various risks including I) sectoral concentration, ii) exposure limits for single and group exposures, and iii) monitoring watch list accounts and the entire portfolio. The risk management philosophy is to identify and monitor risk on a portfolio basis and assess the risk taking capacity of the statement of financial position as a whole. MOOR is responsible for monitoring and reporting of market and liquidity risk as it arises from our trading, investing and lending activities. MOOR also conducts Risk and Self Assessment exercises and maintains Company wide risk registers to monitor operational risks embedded in the Company operations and ensure that sufficient controls are in place against such risks.

Different Management Committees have been set up to review different kinds of risks; mainly being the Assets and Liabilities Committee (ALCO), Credit Committee (CC) and Risk Management Committee (RMC). Comprehensive risk management manuals have been designed which cover all significant risks including credit, liquidity, market and operational risks and provides guidance to management on risk controls, limits, risk measurement tools and a reporting framework.

44.1 Credit risk

Credit risk, i.e. the potential default of one or more debtors, is the largest source of risk for the Company. The Company is exposed to credit risk through its lending and investment activities. The credit risk arising from exposure to corporates is governed by the Credit Risk Management Policy and Credit Administration Frameworks. The counter party credit risk arising from interbank lines are addressed in the Treasury policy framework. The Company has adopted Standardised Approach of Basel II Accord.

The Company manages 3 principal sources of credit risk:

i) Sovereign credit risk

When the Company lends to public sector borrowers, it prefers obtaining a full sovereign guarantee or the equivalent from the Government of Pakistan (GoP). However, certain public sector enterprises have a well defined cash flow stream and appropriate business model based on which the lending is secured through collaterals other than GoP guarantee.

ii) Non-sovereign credit risk

When the Company lends to private sector borrowers it does not benefit from sovereign guarantees or the equivalent. Consequently, each borrower's credit worthiness is analysed on a standalone basis. Two internal rating models are in use to rate (i) Corporate / Commercial customers (ii) SME customers. Frameworks of both these models have been duly approved by the Board.

iii) Counter party credit risk on interbank limits

In the normal course of its business, the Company's Treasury utilises products such as reverse repos and call lendings to meet the needs of the borrowers and manages its exposure to fluctuations in market interest rates and to temporarily invest its liquidity prior to disbursement. All of these financial instruments involve, to varying degrees, the risk that the counterparty in the transaction may be unable to meet its obligation to the Company.

Reflecting a preference for minimising the exposure to counterparty credit risk, the Company maintains eligibility criteria that link the exposure limits to counterparty credit ratings by external rating agencies. For example, the minimum rating for counterparties to be eligible for a financing relationship with the Company is BBB.

Credit administration

Credit Administration Department is involved in minimising losses that could arise due to security and documentation deficiencies.

Risk analytics

To ensure a prudent distribution of asset portfolio, the Company manages its lendings and investment activities within a framework of Borrower, Group, Product, Geographical and Sector exposure limits and risk profile benchmarks.

Stress testing

The Company also conducts stress testing of its existing portfolio, which includes all assets, i.e., advances as well as investments. This exercise is conducted on a quarterly basis through assigning shocks to distressed / non-performing assets of the Company and assessing its resulting effect on capital adequacy.

Regular monitoring

Regular monitoring of the advances portfolio is carried out which focuses on early problem recognition and influences the front office to carry out an assessment of the borrower's ability to rectify the identified problem / weakness within a reasonable time-frame, consider tighter structuring of facilities, confirm that there are no critical deficiencies in the existing security position and, if possible, arrange for strengthening of the same through obtaining additional collateral. It should however, be noted that these actions are taken prior to incurring overdues on the facility.

Portfolio diversification

While expanding the advances and the investment (TFCs) portfolio, efficient portfolio diversification has been a key consideration despite the relatively small size of operations.

Particulars of the Company's significant on-balance sheet and off-balance sheet credit risk in various sectors are analysed as follows:

44.1.1 Lendings to financial institutions

44.2 Market risk

The market risk is the risk of reductions in earnings, value and / or reserves arising from changes in market rates (such as interest rates, exchange rates, credit spreads) and market prices (such as commodities, equities, property etc.) as well as their correlations and volatilities. The Company is exposed to market risk primarily through its trading activities, which are centered in the Treasury and Capital market groups.

The Company classifies its assets in banking and trading books as per instructions from the SBP. The Company's trading book comprises positions in financial instruments held with trading intent or in order to hedge other elements of the trading book and free of any restrictive covenants on their tradability. In addition, positions need to be frequently and accurately valued and the portfolio should be actively managed. The positions which do not fulfil the criteria of trading book falls under the banking book and are treated as per SBP requirements.

The Company's trading book consists of investments in government securities, listed equities and mutual funds. The Company actively measures, controls and manages market risk in its trading book on a day-to-day basis. Controls are applied to all investment portfolios by setting limits to the exposures taken. This includes stop loss limits on shares in 'Held-for-trading' portfolio, individual and sectoral concentration limits, volatility and value-at-risk limits, etc.

The Company measures market risk using various techniques like duration analysis for interest rate risk in banking book, Value-at-Risk for adverse price movement, sensitivity analysis for investment in government securities, stress testing, etc. The results are communicated to ALCO and Risk Management Committee on monthly and quarterly basis respectively. Results are also communicated to the Board of Directors every quarter and to Board's Risk Management Committee on a half-yearly basis. Market risk is effectively managed at the portfolio level. The Company has adopted Standardised Approach of Basel II Accord.

- Unconsolidated statement of profit and loss account

44.2.3 Equity position risk

Equity position risk is the risk that the fair value will fluctuate as a result of changes in prices of individual stocks or the levels of equity indices. The Company's equity investments are either classified as fair value through Other Comprehensive Income (FVOCI) or fair value through profit or loss account (FVPL). The objective of the fair value through OCI portfolio is to maintain a medium term view of capital gains and dividend income while the Company takes advantage of short-term capital gains through its fair value through profit or loss (FVPL) portfolio investments. It is managed by the Company through its internal investment policy which is duly approved by the Board. The policy defines various position limits, portfolio limits and stop loss limits for the equity desk. The Company also applies stress tests on the equity portfolio which is part of the Company's overall market risk exposure limit on the banking book.

44.2.4 Yield / interest rate risk in the banking book (IRRBB) - Basel II Specific

Yield / interest rate sensitivity position for on-balance sheet instruments is based on the earlier of contractual re-pricing or maturity dates and for off-balance sheet instruments is based on settlement dates. This also refers to the non-trading market risk. Apart from the gap analysis between the market rate sensitive assets and liabilities as per the table given below, the Company also conducts interest rate sensitivity analysis in the banking book using the Duration Gap analysis based on its interest rate sensitive assets and interest rate sensitive liabilities. The Company also uses parallel shift in interest rates to determine the impact of adverse rate changes on investments in government securities.

- Interest rate sensitivity of assets and liabilities is measured based on actual re-pricing / maturity behaviour of all interest rate sensitive assets and liabilities.
- Duration GAP is calculated based on interest rate re-pricing of assets and liabilities and is used to determine impact of adverse interest rate movements on the Company's equity. Such an analysis is conducted every month and results are reported to the ALCO and RMC on a monthly and quarterly basis respectively.

44.3 Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events.

The Company, like all financial institutions, is exposed to many types of operational risks, including the potential losses arising from internal activities or external events caused by breakdowns in information, communication, physical safeguards, business continuity, supervision, transaction processing, settlement systems and procedures and the execution of legal, fiduciary and agency responsibilities.

The Company maintains a system of internal controls designed to keep operational risk at appropriate levels, in view of the Company's financial strength and the characteristics of the activities and market in which it operates. These internal controls are periodically updated to conform to the industry's best practices. The Company also gathers operational risk losses to determine strengths and sufficiency of its internal controls.

The Company has developed a Business Continuity Plan applicable to all its functional areas and the plan is rehearsed at least twice in a year.

Furthermore, the Company's operations are relatively simple as compared to a large scale commercial bank. The Company only operates with its head office in Karachi with a liaison office in Lahore. Given simple operations and small scale, Company uses Basic Indicator Approach (BIA) to determine capital charge under Basel II.

Liquidity risk

Liquidity risk is the risk that the Company is unable to fund its current obligations and operations in the most cost efficient manner. ALCO is the forum to oversee liquidity management.

Liquidity risk can arise from the Company's activities and can be grouped into three categories:

- Inflows / outflows from on-balance sheet items (other than marketable securities and wholesale borrowings) and offbalance sheet items;
- Marketability of trading securities; and
- Capacity to borrow from the wholesale markets for funding as well as trading activities.

The Company's main funding source is the inter-bank money market. Changes in the government monetary policy and market expectations of interest rate are all important factors that can adversely affect our key funding sources. Efficient and accurate planning plays a critical role in liquidity management. The Company's MIS provides information on expected cash inflows / outflows which allows the Company to take timely decisions based on future requirements. The Company monitors all the possible sources from which liquidity risk can emanate including market reputation, borrowing terms, deterioration in quality of credit portfolio, etc. Other sources are also identified for which early warning indicators have been created and are being monitored for early intervention of management sensing a potential liquidity crunch.

Gap analysis and stress testing is done on a periodic basis to capture any adverse effect of market movements on liquidity position. Based on the results produced, ALCO devises the liquidity management strategy to maintain sufficient liquidity to deal with any related catastrophe.

INDEPENDENT AUDITOR'S REPORT

To the members of Pak Brunei Investment Company Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the annexed consolidated financial statements of Pak Brunei Investment Company Limited (the Holding Company), and its subsidiaries (the Group), which comprise the consolidated statement of financial position as at December 31, 2023, and the consolidated statement of profit and loss account, the consolidated statement of comprehensive income, the consolidated statement of changes in equity, the consolidated cash flow statement for the year then ended, and notes to the consolidated financial statements, including a summary of material accounting policies information, and we state that we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of the audit.

In our opinion and to the best of our information and according to the explanations given to us, the consolidated statement of financial position, consolidated statement of profit and loss account, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated cash flow statement together with the notes forming part thereof conform with the accounting and reporting standards as applicable in Pakistan and give the information required by the Companies Act, 2017 (XIX of 2017), in the manner so required and respectively give a true and fair view of the state of the Group's affairs as at December 31, 2023 and of the profit, the comprehensive income, the changes in equity and its cash flows for the year then ended.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants as adopted by the Institute of Chartered Accountants of Pakistan (the Code), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other than the Consolidated Financial Statements and Auditor's Reports Thereon

Management is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the consolidated and unconsolidated financial statements and our auditor's reports thereon. Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance or conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regards.

Responsibilities of Management and Board of Directors for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the accounting and reporting standards as applicable in Pakistan and the requirements of Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so

The Board of Directors are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due
 to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
 is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
 misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion,
 forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the
 disclosures, and whether the consolidated financial statements represent the underlying transactions and
 events in a manner that achieves fair presentation.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

YOUSUF ADIL

Other Matter

The consolidated financial statements of the Group for the year ended December 31, 2022 were audited by another firm of Chartered Accountants who through their report dated April 13, 2023 expressed an unqualified opinion thereon.

The engagement partner on the audit resulting in this independent auditor's report is Hena Sadiq.

Director

PAK BRUNEI INVESTMENT COMPANY LIMITED NOTES, COMPRISING MATERIAL ACCOUNTING POLICY AND OTHER EXPLANATORY INFORMATION FOR THE YEAR ENDED DECEMBER 31, 2023

1 STATUS AND NATURE OF BUSINESS

The "Group" consists of:

Holding Company

Pak Brunei Investment Company Limited (the Holding Company) is a Development Finance Institution (DFI) which was incorporated in Pakistan as an unlisted public limited Company on November 28, 2006 under the repealed Companies Ordinance, 1984 (now Companies Act, 2017). The State Bank of Pakistan (SBP) granted the approval for commencement of business with effect from August 20, 2007. The Holding Company is a joint venture between the Government of Pakistan (GoP) and the Brunei Investment Agency (BIA). The Holding Company's objectives interalia include making investments in the industrial and agro-based industrial fields in Pakistan on a commercial basis through carrying out industrial and agro-based industrial projects and marketing of their products in Pakistan and abroad and to undertake other feasible business and to establish and acquire companies to conduct various businesses. The registered office of the Holding Company is situated at Horizon Vista, Plot no. Commercial 10, Block 4, Scheme 5, Clifton, Karachi, Pakistan. The Holding Company is in operation with 2 offices (2022: 2) one located in Karachi and the other in Lahore.

Subsidiaries

- Awwal Modaraba Management Limited (AMML) - 100% holding

Awwal Modaraba Management Limited (AMML) was incorporated in Pakistan on June 05, 2014 as an unlisted public company under the repealed Companies Ordinance, 1984 (now Companies Act, 2017). Subsequently, it was registered as a Modaraba Management Company with the Registrar of Modaraba Companies and Modarabas under the Modaraba Companies and Modaraba (Floatation and Control) Ordinance, 1980. AMML is a wholly owned subsidiary of Pak Brunei Investment Company Limited (the Holding Company) with its registered office situated at Horizon Vista, Commercial-10, Block-4, Scheme-5, Clifton, Karachi, Pakistan.

The principal activity of the Company is to engage in the business of floatation of Modarabas and to function as a Modaraba Management Company within the meaning of the Modaraba Companies and Modaraba (Floatation and Control) Ordinance, 1980.

The Company floated Awwal Modaraba on January 4, 2016 and was managing Awwal Modaraba since then. The Securities and Exchange Commission of Pakistan (SECP) via order no. SC/M/PRDD/KASB/2019/36 dated January 31, 2020, appointed Awwal Modaraba Management Limited as the Management Company of KASB Modaraba, First Prudential Modaraba and First Pak Modaraba with effect from February 3, 2020.

These Modarabas are perpetual in nature and are engaged in providing working capital, term finance, ijarah, musharaka, morabaha and other shariah compliant instruments to credit worthy customers and investment in securities. These Modarabas are listed on the Pakistan Stock Exchange Limited.

As part of the business plan, the Board of Directors of Holding Company in their meeting held on March 11, 2022 approved to merge the Awwal Modaraba with and into Awwal Corporate Restructuring Company Limited (ACRCL) and KASB Modaraba, First Pak Modaraba with and into First Prudential Modaraba. The proposed schemes of arrangement for the mergers were approved / sanctioned by the Sindh High Court on March 02, 2023, effective from December 31, 2021. Consequently, the surviving Modaraba i.e. First Prudential Modaraba is being managed by the Company.

The Board of Directors of Holding Company has decided to proceed with divestment of its total interest in AMML. Accordingly, the Board of Directors in their meeting held on September 30, 2023 directed to disseminate the significant development to relevant authorities and stakeholders in a timely and transparent manner.

The material information was sent to the PSX and SECP of Pakistan on September 30, 2023.

On October 12, 2023, invitation for Expression of Interest was published in the newspaper for complete acquisition of AMML including management rights of the modaraba.

On November 21, 2023, the Holding Company informed the Registrar Modaraba, SECP about the receipt of bids from various parties. The SECP vide letter dated November 21, 2023, directed to apply to the Registrar Modaraba for the transfer of AMML shares and management rights of the modaraba to the proposed acquirer.

As of the reporting date, the process of evaluation / review of the bids, received by the Holding Company, is in progress for selection of successful party. After finalisation of the assessment process the matter shall be forwarded to the Registrar Modaraba to seek permission for transfer of AMML shares along with the management rights of the modaraba as advised by SECP.

Standalone financial statements of AMML have been prepared on a going concern basis as the Modaraba under the Management company is in profitable operations and Holding company's (PBICL) financial support exists at the reporting date. Holding Company would continue it's financial support to the Company till divestment of its total interest, however assets and liabilities have been classified under held for sale in these consolidated financial statement. Bids received by the Holding Company indicate that no impairment is required in the assets of the Company.

- Primus Leasing Limited (PLL) - 100% holding

Primus Leasing Limited ("PLL") was incorporated in Pakistan as a public unlisted company on July 13, 2017 under the Companies Act, 2017. The registered office of PLL is situated at Horizon Vista, Commercial-10, Block-4, Scheme-5, Clifton, Karachi. The PLL is licensed to carry out leasing business as a Non-Banking Finance Company (NBFC) under the Non-Banking Finance Companies (Establishment and Regulations) Rules, 2003 issued by the Securities and Exchange Commission of Pakistan (SECP). PLL has two offices with one located in Karachi and the other in Lahore.

The principal objective of PLL is to carry on and undertake the business of leasing of movable property for any purpose whatsoever including but not being limited to industrial, commercial, agricultural and other development purposes on such terms, covenants and conditions and at such rentals as may be deemed fit.

- Awwal Corporate Restructuring Company Limited - 99.78% holding

Awwal Corporate Restructuring Company Limited (ACRCL) is an unlisted public limited company incorporated, under the Companies Act 2017, on December 24, 2021. The registered office of Awwal Corporate Restructuring Company Limited is situated at 3rd floor, Horizon Vista, Plot No. Commercial 10, Block No. 4, Scheme No.5, Clifton, Karachi.

The principal activity of ACRCL is to conduct business as per Corporate Restructuring Act 2016 and Corporate Restructuring Rules 2019 notified by the Securities & Exchange Commission of Pakistan (SECP).

Standalone financial statements of ACRCL were prepared for extended period from December 24, 2021 to December 31, 2022. These financial statements were used for the purpose of consolidation.

The Board of Directors of Holding Company in their meeting held on March 11, 2022 approved the scheme of arrangement entailing the merger of Awwal Modaraba (AM) with and into ACRCL. Subsequently on March 02, 2023, High Court of Sindh approved / sanctioned the merger scheme by way of amalgamation of AM with and into ACRCL effective from December 31, 2021. The entire undertaking comprising of all of assets, liabilities and obligations of AM stands transferred to and be vested in and assumed by ACRCL, leading to the dissolution of AM without winding-up, therefore it has been excluded from comprative. ACRCL standalone financial statements have been restated to incorporate the effect of effect of IFRS - 9, on assets and liabilities of AM which are now merge in ACRCL, therefore comparatives of consolidated financial statements have been restated to incorporate the effect of amalgamation as detailed in note 4.22.3.

2 BASIS OF PRESENTATION

2.1 These consolidated financial statements have been prepared in conformity with the format of financial statements prescribed by the State Bank of Pakistan (SBP) vide BPRD Circular No. 02 of 2023 dated February 09, 2023 effective from the accounting year ending December 31, 2023. The implementation of the revised forms has resulted in certain changes to the presentation and disclosures of various elements of these consolidated financial statements. Right of use assets and corresponding lease liability are now presented separately on the face of the consolidated statement of financial position. Previously these were presented under property and equipment (previously titled fixed assets) and other liabilities respectively. There is no financial impact of this change on these consolidated financial statements.

Further SBP vide through BPRD Circular letter No.7 of 2023 dated April 13, 2023 deferred the implementation of IFRS-09 and format of financial statements till January 01, 2024 with option of early adoption. The Holding Company has opted to adopt IFRS- 09 in the current year and therefore has also opted to prepare these consolidated financial statements in the revised format.

2.2 Statement of compliance

These consolidated financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. These comprise of:

- International Financial Reporting Standards (IFRSs) issued by the International Accounting Standards Board (IASB) as are notified under the Companies Act, 2017;
- Islamic Financial Accounting Standards (IFAS) issued by the Institute of Chartered Accountants of Pakistan (ICAP) as are notified under the Companies Act, 2017;
- Provisions of and directives issued under the Banking Companies Ordinance, 1962;
- Provisions of and directives issued under the Companies Act, 2017; and
- Directives issued by the State Bank of Pakistan (SBP) and the Securities and Exchange Commission of Pakistan (SECP) from time to time.

Whenever the requirements of the Banking Companies Ordinance, 1962, the Companies Act, 2017, or the directives issued by the SBP and the SECP differ with the requirements of IFRSs or IFAS, the requirements of the Banking Companies Ordinance, 1962, the Companies Act, 2017 and the said directives shall prevail.

The SBP through its BSD Circular letter No. 11 dated September 11, 2002 has deferred the implementation of IAS 40 'Investment Property' for Non-Banking Financial Institutions (NBFIs) in Pakistan. The Holding Company has adopted IFRS 9 'Financial Instruments' from January 01, 2023 however other entities of the group have adopted IFRS - 9 in the prior year(s). The detail of the first time adoption for Holding Company is disclosed in note 4. Moreover adoption of IFRS 9 and new format has included IFRS 7 disclosures in these consolidated financial statements therefore the Group has also adopted IFRS 7 from January 01, 2023.

2.4 Standard and amendments to IFRS that are effective for the year ended December 31, 2023

There are certain new and amended standards, interpretations and amendments that are mandatory for the Group's accounting periods beginning on or after January 1, 2023 but are considered not to be relevant or do not have any significant effect on the Group operations and, therefore, not detailed in these consolidated financial statements, other than IFRS- 09 impact of which have been disclosed in note 4.

- IFRS 9 'Financial Instruments'.
- Amendments to IAS 1 'Presentation of Financial Statements' Disclosure of accounting policies.
- Amendments to IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors' Definition of accounting estimates.
- Amendments to IAS 12 'Income Taxes' deferred tax related to assets and liabilities arising from a single transaction.
- Amendments to IAS 12 'Income taxes' International Tax Reform Pillar Two Model Rules.

2.5 Standard and amendments to IFRS that are not yet effective

The following standard and amendments are effective for accounting periods, beginning on or after the date mentioned against each of them. These are either not relevant to the Group's operations or are not expected to have significant impact on the Group's consolidated financial statements other than certain additional disclosures.

Effective from accounting period beginning on or after

| - | Amendments to IFRS 16 'Leases' - Clarification on how seller-lessee subsequently measures sale and leaseback transactions | January 01, 2024 |
|---|---|------------------|
| • | Amendments to IAS 1 'Presentation of Financial Statements' - Non-current liabilities with Convents along with Classification of liabilities as current or non-current | January 01, 2024 |
| - | Amendments to IAS 7 'Statement of Cash Flows' and 'IFRS 7 'Financial instruments disclosures' - Supplier Finance Arrangements | January 01, 2024 |
| - | Amendments to IAS 21 'The Effects of Changes in Foreign Exchange Rates' - Clarification on how entity accounts when there is long term lack of exchangeability | January 01, 2025 |
| - | IFRS 17 – 'Insurance Contracts' (including the June 2020 and December 2021 Amendments to IFRS 17) | January 01, 2026 |

Other than the aforesaid, the International Accounting Standards Board (IASB) has also issued the following standard which has not been adopted locally by the Securities and Exchange Commission of Pakistan:

IASB Effective date (annual periods beginning on or after)

Standard

IFRS 1 - 'First time adoption of International Financial Reporting Standards'

01 July 2009

2.6 Critical accounting estimates and judgments

The preparation of the consolidated financial statements in conformity with the accounting and reporting standards as applicable in Pakistan requires the management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and income and expenses. It also requires the management to exercise judgment in the application of its accounting policies. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. These estimates and assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of revision and future periods if the revision affects both current and future periods.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future period if the revision affects both current and future periods. The estimates and judgments that have a significant effect on the consolidated financial statements are in respect of the following:

Significant accounting estimates and areas where judgments were made by the management in the application of accounting policies are as follows:

- i) classification, valuation and provisioning of investments (notes 4.5 and 8);
- ii) classification and expected credit loss against non performing loans and advances (notes 4.7 and 9);
- iii) provision for defined benefit plan (notes 4.15 and 36);
- iv) lease liability and right-of-use assets (notes 4.8.3, 18 and 11);
- v) taxation (notes 4.13 and 32);
- vi) assets classified as held-for-sale (notes 4.11 and 15); and
- vii) provision against off balance sheet obligations and contingent liabilities (note 22 and 31).

3 BASIS OF MEASUREMENT

3.1 Accounting convention

These consolidated financial statements have been prepared under the historical cost convention except for the following:

- Non-current assets classified as held for sale are valued at lower of carrying amount and fair value less cost to sell;
- Certain investments are marked to market and carried at fair value;
- Obligation in respect of staff retirement benefit is carried at present value of defined benefit obligation; and
- Lease liability against right-of-use assets is carried at present value of rentals.

3.2 US Dollar equivalent

The US dollar amounts shown in the consolidated statement of financial position, consolidated statement of profit and loss account, consolidated statement of comprehensive income and consolidated cash flow statement are provided as additional information solely for the convenience of users of the consolidated financial statements. For the purpose of conversion to US Dollars, the rate of Rs. 281.74 to US Dollars has been used for 2023 and 2022 as it was the prevalent rate on December 31, 2023.

3.3 Functional and presentation currency

Items included in the consolidated financial statements are measured using the currency of the primary economic environment in which the Group operates. These consolidated financial statements are presented in Pakistan Rupee which is the Group's functional and presentation currency.

4 MATERIAL ACCOUNTING POLICIES INFORMATION

The accounting policies adopted in the preparation of these consolidated financial statements are consistent with those of the previous financial year except for those mentioned in note 4.1.1.

The material accounting policies applied in the preparation of these financial statements are set out below. In addition, the Company adopted Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2) from January 1, 2023. The amendments require the disclosure of 'material', rather than 'significant', accounting policies. Although the amendments did not result in any changes to the accounting policies themselves.

4.1 Material accounting policy and financial risk management

4.1.1 Adoption of new forms for the preparation of consolidated financial statements

During the period, the SBP, vide its BPRD Circular No. 02 dated February 09, 2023, issued the revised forms for the preparation of financial statements of the Banks / DFIs which are applicable for the periods beginning on or after January 1, 2023 which was subsequently deferred to January 1, 2024. Adoption of new format has been detailed in note 2.1.

The Group has adopted the above changes in the presentation and made additional disclosures to the extent applicable to its operations and corresponding figures have been rearranged / reclassified to correspond to the current year presentation.

4.1.2 Basis of consolidation

Subsidiary is an entity which is controlled by the Holding Company. Control is said to exist when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

The consolidated financial statements of the Group incorporate the financial statements of the Holding Company and those of the subsidiaries from the date the control of the subsidiary by the Group commences until the date the control ceases to exist. The assets, liabilities, income and expenses of the subsidiaries have been consolidated with those of the Holding Company on a line by line basis and the carrying values of the Group's investments in subsidiaries are eliminated against the subsidiaries' share capital and pre-acquisition reserves in these consolidated financial statements.

Non-Controlling Interest (NCI) represents that part of the net results of operations and net assets of the subsidiaries that is not owned by the Group and is measured at the proportionate share of net assets of the acquiree.

The financial statements of subsidiaries are prepared for the same reporting period as that of the Holding Company using accounting policies which are consistent with those applied by the Holding Company in the preparation of its consolidated financial statements.

Material intra-group balances and transactions have been eliminated.

4.2 IFRS 9 - 'Financial Instruments'

IFRS 9 brings fundamental changes to the accounting for financial assets and to certain aspects of accounting for financial liabilities. To determine appropriate classification and measurement category, IFRS 9 requires all financial assets, except equity instruments to be assessed based on combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics. The adoption of IFRS 9 has also fundamentally changed the impairment method of financial assets with a forward-looking Expected Credit Losses (ECL) approach.

4.2.1 Classification

Under IFRS 9, existing categories of financial assets: Held for trading (HFT), Available for sale (AFS) and Held to maturity (HTM) have been replaced by:

- Financial assets at fair value through profit or loss account (FVTPL)
- Financial assets at fair value through other comprehensive income (FVOCI)
- Financial assets at amortised cost

Under IFRS 9, the accounting for financial liabilities remains largely the same as before adoption of IFRS 9 and thus all financial liabilities are being carried at amortised cost. Financial liabilities can also be designated at FVTPL where gains or losses arising from entity's own credit rating risk relating to are required to be presented in other comprehensive income with no reclassification to the profit or loss account. The Group did not have any financial liability measured at FVTPL.

4.2.2 Business model assessment

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- The objectives for the portfolio, in particular, whether the management's strategy focuses on earning contractual revenue, maintaining a particular yield profile, matching the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;
- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the Group's key management personnel;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed; and
- The expected frequency, value and timing of sales are also important aspects of the Group's assessment. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Group's stated objective for managing the financial assets is achieved and how cash flows are realised.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Eventually, the financial assets fall under either of the following three business models:

- I) Hold to Collect (HTC) Business Model: Holding assets in order to collect contractual cash flows
- ii) Hold to Collect and Sell (HTC&S) Business Model: Collecting contractual cash flows and selling financial assets
- iii) Other Business Models: Resulting in classification of financial assets as FVTPL

4.2.3 Assessments whether contractual cash flows are solely payments of principal and profit (SPPI)

As a second step of its classification process the Group assesses the contractual terms of financial assets to identify whether they meet the SPPI test. 'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium / discount). The most significant elements of profit within a financing arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the profit rate is set. In contrast, contractual terms that introduce a more than de minimise exposure to risks or volatility in the contractual cash flows that are unrelated to a basic financing arrangement do not give rise to contractual cash flows that are solely payments of principal and profit on the amount outstanding. In such cases, the financial asset is required to be measured at FVTPL.

4.2.4 Application to the Group's financial assets

Debt based financial assets

Debt based financial assets held by the Group (including; advances, lending to financial institutions, investment in federal government securities, term finance certificates, other private sukuk, cash and balances with treasury banks, balances with other banks, and other financial assets) are measured at amortised cost if they meet both of the following conditions and is not designated as at FVTPL:

- the assets are held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding.

The Group's business model for these financial assets can still be HTC even when sales of these financial assets occur. However, if more than an infrequent number of sales or sale(s) of significant value are / is made, the Group assess whether and how the sales are consistent with the HTC objective. This assessment include the reason(s) for the sales, the expected frequency of sales, and whether the assets that are sold are held for an extended period of time relative to their contractual maturities.

The aforementioned financial assets are measured at FVOCI only if these meet both of the following conditions and are not designated as at FVTPL:

- the asset are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding.

The aforementioned financial assets if held for trading purposes are classified as measured at FVTPL.

In addition, on initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

The application of these policies also resulted in reclassifications and consequent remeasurements of certain amount of investments in PIBs and T-bills held under available for sale portfolio as of December 31, 2022 based on the business model embodied in the Group's pool management practices. Moreover, the Group's investment in sukuk / TFC under available for sale portfolio as of December 31, 2022 have been reclassified as FVOCI if they fail SPPI criteria they should be classified as FVTPL. The following table reconciles their carrying amounts as reported on December 31, 2022 to the carrying amounts under IFRS 9 on transition to IFRS 9 on January 01, 2023.

Equity based financial assets

An equity instrument held by the Group for trading purposes is classified as measured at FVTPL. On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investment-by-investment basis. The Group has decided to classify its available for sale equity investment portfolio as of December 31, 2022 as FVOCI on irrevocable basis.

IFRS 9 has eliminated impairment assessment requirements for investments in equity instruments. However, unlisted equity instruments are required to be measured at lower of cost or breakup value till December 31, 2023 under the SBP's instructions. Accordingly the Group has reversed impairment of Rs. 73.460 million on listed equity investment held as at December 31, 2022 and the same has been transferred to deficit on revaluation of investments through remeasurements.

The measurement category and carrying amount of financial assets in accordance with the accounting and reporting standards as applicable in Pakistan before and after adoption of IFRS 9 as at January 1, 2023.

4.2.5 Initial recognition and measurement

Financial assets and financial liabilities are recognised when the entity becomes party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised on trade date, the date on which the Group purchase or sell the asset. Other financial assets and liabilities like advances, lending to financial institutions, deposits etc. are recognised when funds are transferred to the customers' account or financial institutions. However, for cases, where funds are transferred on deferred payment basis, recognition is completed when underlying asset is purchased. The Group will recognise, due to customer and financial institution balances when these funds reach the Group.

Amortised cost

Financial assets and liabilities under amortised cost category are initially recognised at fair value adjusted for directly attributable transaction costs. These are subsequently measured at amortised cost. An expected credit loss allowance (ECL) is recognised for financial assets in the profit and loss. Interest income / expense on these assets / liabilities are recognised in the consolidated statement of profit and loss account. On derecognition of these financial assets and liabilities, capital gain / loss will be recognised in the consolidated statement of profit and loss account.

Fair value through other comprehensive income

Financial assets under FVOCI category are initially recognised at fair value adjusted for directly attributable transaction costs. These assets are subsequently measured at fair value with changes recorded in OCI. An expected credit loss allowance (ECL) is recognised for these financial assets in the consolidated statement of profit and loss account. Interest / dividend income on these assets are recognised in the consolidated statement of profit and loss account. On derecognition of these financial assets, capital gain / loss is recognised in the other comprehensive income.

Fair value through profit or loss

Financial assets under FVTPL category are initially recognised at fair value. Transaction costs are directly recorded in the profit or loss. These assets are subsequently measured at fair value with changes recorded in the consolidated statement of profit and loss account. Interest / dividend income on these assets are recognised in the consolidated statement of profit and loss account. On derecognition of these financial assets, capital gain / loss is recognised in the consolidated statement of profit and loss account. An expected credit loss allowance (ECL) is not recognised for these financial assets.

The Group's revenue recognition policy is consistent with the annual consolidated financial statements for the year ended December 31, 2022.

4.2.6 Restructured Loan

All non-performing restructured exposure shall be subject to a cooling-off period of 6 months from the first date of becoming regular in payment. The status of such loans shall be first upgraded to Stage 2 following the same cooling-off period of 6 months before upgrading to Stage 1.

4.2.7 Interest free / below market rate loans to employees

Initial recognition

The Group recognise interest free/ below market rate loan to employee at its fair value by discounting the future loan repayments using the rate that the employee would pay to an unrelated lender for a loan with similar conditions and accordingly charging differential to the consolidated statement of profit and loss account between nominal value and fair value of loan.

Subsequent measurement

The Group calculates and recognises imputed interest on these loans. Imputed interest represents the forgone interest that employees would have paid if they had borrowed funds from external sources at prevailing market rates. The difference between the actual interest charged, if any and the imputed interest is recognised as interest income by the Group over the term of the loan.

Financial assets

The Group derecognises a financial asset when:

- the contractual rights to the cash flows from the financial asset expire; or
- it transfers the rights to receive the contractual cash flows in a transaction in which either:
- substantially all of the risks and rewards of ownership of the financial asset are transferred; or
- the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Group enters into transactions whereby it transfers assets recognised in its consolidated statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

Financial liabilities

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled, or expired. The Group also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in the consolidated statement of profit and loss account.

4.2.8 Modification

The Group sometimes renegotiates or otherwise modifies the contractual cash flows of financing to its customers. When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset in accordance with IFRS 9, the Group recalculate the gross carrying amount of the financial asset and shall recognise a modification gain or loss in the consolidate statement of profit and loss account. The gross carrying amount of the financial asset shall be recalculated as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective profit rate (or credit-adjusted effective profit rate for purchased or originated credit-impaired financial assets). Any costs or fees incurred adjust the carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

4.2.9 Off setting

Financial assets and financial liabilities are only offset and the net amount is reported in the financial statements when there is a legally enforceable right to set-off the recognised amount and the Group intends either to settle on a net basis, or to realise the assets and to settle the liabilities simultaneously.

4.2.10 Financial assets and liabilities

Financial assets and financial liabilities are recognised at the time when the Group becomes a party to the contractual provision of the instrument. Financial assets are de-recognised when the contractual right future cash flows from the asset expires or is transferred along with the risk and reward of the asset. Financial liabilities are de-recognised when obligation specific in the contract discharge, cancel or expire. Any gain or loss on derecognition of the financial asset and liability is recognised in the consolidated statement of profit and loss account of the current year.

4.2.11 Derivative financial instruments

Derivative financial instruments are initially recognised at their fair value on the date on which the derivative contract is entered into and are subsequently remeasured at fair value. All derivative financial instruments are carried as asset when fair value is positive and liabilities when fair value is negative. Any change in the value of derivative financial instruments is taken to the consolidated statement of profit and loss account.

4.2.12 Overview of the ECL principles

The Group assesses on a forward-looking basis the expected credit losses ('ECL') associated with all advances and other debt financial assets not held at FVTPL, together with letter of credit, guarantees and unutilised financing commitments hereinafter referred to as "Financial Instruments". The Group recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL) as outlined below.

The 12mECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Both LTECLs and 12mECLs are calculated at individual customer level.

The Group has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument. The Group considers an exposure to have significantly increased in credit risk when there is considerable deterioration in the internal rating grade for subject customer. The Group also applies a secondary qualitative method for triggering a significant increase in credit risk for an asset, such as moving a customer / facility to the watch list, or the account becoming forborne.

Regardless of the change in credit grades, generally, the Group considers that there has been a significant increase in credit risk when contractual payments are more than 60 days past due. However, for certain portfolios, the Group may rebut 60 DPD presumption based on behavioural analysis of its borrowers. When estimating ECLs on a collective basis for a group of similar assets, the Group applies the similar principles for assessing whether there has been a significant increase in credit risk since initial recognition.

Based on the above process, the Group groups its financial instruments into Stage 1, Stage 2, Stage 3 and purchased or originated credit impaired (POCI), as described below:

Stage 1: When financial instruments are first recognised, the Group recognises an allowance based on 12mECLs. Stage 1 financial instruments also include facilities where the credit risk has improved and they have been reclassified from Stage 2. The 12mECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Group calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast exposure at default (EAD) and multiplied by the expected loss given default (LGD) and discounted by an approximation to the original effective interest rate (EIR). This calculation is made for all the scenarios.

- Stage 2: When a financial instrument has shown a significant increase in credit risk since origination, the Group records an allowance for the LTECLs. Stage 2 also includes facilities, where the credit risk has improved and the instrument has been reclassified from Stage 3. The mechanics are similar to those explained above, including the use of multiple scenarios, but probability of defaults (PDs) are applied over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original effective interest rate (EIR).
- Stage 3: For financial instruments considered credit-impaired, the Group recognises the lifetime expected credit losses for these instruments. The Group uses a probability of default (PD) of 100% and loss given default (LGD) as computed for each portfolio or as prescribed by the SBP under the Prudential Regulations which ever is higher.
- POCI: Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and profit / rental is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.
- Undrawn When estimating LTECLs for undrawn financings commitments, the Group estimates the expected portion of the financings commitment that will be drawn down over its expected life. The ECL is then based on the present value of the expected shortfalls in cash flows if the financing is drawn down, based on a probability-weighting of the three scenarios. For revolving facilities that include both a financing and an undrawn commitment, ECLs are calculated and presented within other liabilities.
- Guarantee and letters of credit contracts

 The Group estimates ECLs based on the BASEL driven credit conversion factor (CCF) for Guarantee and letter of credit contracts. The calculation is made using a probability-weighting of the three scenarios. The ECLs related to guarantee and letter of credit contracts are recognised within other liability.

Effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liabilities to the gross carrying amount of a financial asset or to the amortised cost of a financial liability.

The calculation of ECLs

The Group calculates ECLs based on a three probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to a Group in accordance with the contract and the cash flows that the Group expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

- PD The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio. PD is estimated based on statistical technique such as Markov's Chain Process Transition Matrix Approach which are based on the Group's internal risk ratings (i.e. from 1 to 12). PDs for Non advances portfolio, the Group has used PDs prescribed by Standard and Poor's (S&Ps) against each risk rating. PDs are then adjusted using Vasicek Model for IFRS 9 ECL calculations to incorporate forward looking information.
- EAD The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and profit, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments. The maximum period for which the credit losses are determined is the contractual life of a financial instrument unless the Group has the legal right to call it earlier. The Group's product offering includes a variety of corporate facilities, in which the Group has the right to cancel and / or reduce the facilities with one day notice. However, in case of revolving facilities, the Group does not limit its exposure to credit losses to the contractual notice period, but, instead calculates ECL over a period that reflects the Group's expectations of the customer behaviour, its likelihood of default and the Group's future risk mitigation procedures, which could include reducing or cancelling the facilities.
- LGD The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD.

The discount rate used to discount the ECLs is based on the effective profit rate that is expected to be charged over the expected period of exposure to the facilities. In the absence of computation of the effective profit rate (at reporting date), the Group uses an approximation e.g. contractual rate (at reporting date).

To mitigate its credit risks on financial assets, the Group seeks to use collateral, where possible. The Group considers only those collaterals as eligible collaterals in the EAD calculation which have the following characteristics:

- History of legal certainty and enforceability
- History of enforceability and recovery

When estimating the ECLs, the Group considers three scenarios (a base case, an upside, a downside). Each of these is associated with different PDs. When relevant, the assessment of multiple scenarios also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure and the value of collateral or the amount that might be received for selling the asset.

Forward looking information

In its ECL models, the Group relies on a range of forward looking information as economic inputs, such as:

- GDP growth
- Consumer price index

Definition of default

The Group defines a financial instrument as in default, which is fully aligned with the definition of credit impaired, when it meets one or more of the following criteria:

- The customer is more than 90 days past due on its contractual payments.

Further the following criteria has been determined for assessment of default:

- The Group makes a charge-off or account-specific provision resulting from a perceived decline in credit quality subsequent to the Group taking on the exposure,
- The Group sells the credit obligation at a material credit-related economic loss,
- The Group consents to a distressed restructuring of the credit obligation where this is likely to result in a diminished financial obligation caused by the material forgiveness, or postponement, of principal, interest or (where relevant) fees.
- The Group has filed for the obligor's bankruptcy or a similar order in respect of the obligor's credit obligation to the industry group, and
- The obligor has sought or has been placed in Bankruptcy or similar protection where this would avoid or delay repayment of the credit obligation to the industry group.

4.2.13 Write-offs

The Group's accounting policy under IFRS 9 remains the same as it was under SBP regulations.

4.2.14 The Holding Company has adopted IFRS 9 effective from January 01, 2023 with modified retrospective approach for restatement permitted under IFRS 9. The cumulative impact of initial application of IFRS-9 is Rs. 247.707 million has been recorded as an adjustment to equity at the beginning of the current accounting period. The details of the impacts of initial application are tabulated below:

4.3 Cash and cash equivalents

Cash and cash equivalents for the purpose of consolidated cash flow statement represent cash in hand, balances with treasury banks, balances with other banks in current and deposit accounts and short-term highly liquid investments with original maturities of three months or less.

4.4 Lendings to / borrowings from financial and other institutions

The Group enters into repurchase agreements (repo) and reverse repurchase agreements (reverse repo) at contracted rates for a specified period of time. These are recorded as under:

(a) Sale of securities under repurchase agreements

Securities sold with a simultaneous commitment to repurchase at a specified future date (repos) continue to be recognised in the consolidated financial statements and are measured in accordance with accounting policies for investment securities. The counterparty liability for amounts received under these agreements is included in borrowings. The difference between sale and repurchase price is treated as mark-up / return / interest expense and accrued over the life of the repo agreement using effective interest method.

(b) Purchase of securities under resale agreements

Securities purchased with a corresponding commitment to resell at a specified future date (reverse repos) are not recognised in the consolidated financial statements as the Group does not obtain control over the securities. Amounts paid under these agreements are included in lendings to financial institutions. The difference between purchase and resale price is treated as mark-up / return / interest income and accrued over the life of the reverse repo agreement using effective interest method.

4.5 Investments (for comparatives)

4.5.1 Classification

The Group classifies its investment portfolio, other than investments in associates, into the following categories:

Held-for-trading

These represent securities which are either acquired for the purpose of generating profit from short-term fluctuations in market prices, interest rates or dealers' margins or are securities included in a portfolio in which a pattern of short-term profit making exists and are intended to be sold within 90 days of acquisition.

Held-to-maturity

These are securities with fixed or determinable payments and fixed maturity which the Group has the positive intent and ability to hold till maturity.

Available-for-sale

These are investments (other than those in associates) that do not fall under the held-for-trading or held-to-maturity categories.

4.5.2 Initial measurement

All purchases and sales of investments that require delivery within the time frame established by regulations or market conventions are recognised at the trade date. Trade date is the date on which the Group commits to purchase or sell the investment.

Investments classified as held-for-trading are initially recognised at fair value, and transaction costs are expensed in the consolidated statement of profit and loss account. Investments, other than those categorised as held-for-trading, are initially recognised at fair value which includes transaction costs associated with the investments.

4.5.3 Subsequent measurement

Held-for-trading

These are subsequently measured at fair value. Any unrealised surplus / deficit arising on revaluation is taken to the consolidated statement of profit and loss account.

Held-to-maturity

These are carried at amortised cost using the effective interest method, less any impairment recognised to reflect irrecoverable amounts.

Available-for-sale

Quoted securities classified as available-for-sale are subsequently measured at fair values. Any surplus or deficit arising thereon is taken to 'consolidated statement of comprehensive income' and is taken to the consolidated statement of profit and loss account when realised upon disposal or when the investment is considered to be impaired.

Unquoted equity securities are valued at the lower of cost and break-up value. The break-up value of these securities is calculated with reference to the net assets of the investee Group as per the latest available audited financial statements. The cost of investment is determined on a weighted average basis. A decline in the carrying value is charged to the consolidated statement of profit and loss account. Investments in other unquoted securities are valued using the rates issued by Mutual Fund Association of Pakistan (MUFAP). However, for those securities whose market value is not readily available from MUFAP are carried at cost. Any surplus or deficit arising as a result of revaluation is taken to 'consolidated statement of comprehensive income'.

4.6 Investments in associates

Associates are entities over which the Group has a significant influence but over which control does not exist.

Investments in associates are accounted for using the equity method of accounting. Under the equity method, the investments in associates are initially recognised at cost plus investor's share of the profit or loss of the investees subsequent to the date of acquisition less impairment in value (if any). The investor's share of profit or loss of associates is recognised in the consolidated consolidate statement of profit and loss account.

4.7 Advances (for comparatives)

Advances are stated net of specific and general provisions which are charged to the consolidated statement of profit and loss account. Specific provisions are made in accordance with the requirements of the Prudential Regulations issued by the SBP which prescribe an age-based criteria for classification of non-performing loans and advances and computing provision / allowance there against. The Group also performs a subjective evaluation of its advances which is based on various factors including the historical repayment pattern, past dues, delinquency in the account, financial position of the borrowers, etc. as prescribed under the Prudential Regulations. General provision is maintained where required as per the requirements of the Prudential Regulations. Advances are written-off where there are no realistic prospects of recovery. Provision against loans, leases and Musharakah financing relating to subsidiaries are made as per the respective regulatory and financial reporting requirements applicable on subsidiaries.

Leases are classified as finance leases when the Group transfers substantially all the risks and rewards incidental to the ownership of an asset to the lessee. A receivable is recognised at an amount equal to the present value of minimum lease payments, including guaranteed residual value, if any. The net investment in finance lease is included in advances to customers.

Diminishing Musharakah is a partnership agreement between the Group and its customers for financing plant and machinery. The receivable is recorded to the extent of the Group's share in the purchase of assets.

4.8 Fixed assets and depreciation

4.8.1 Tangible assets - owned

Operating fixed assets are stated at cost less accumulated depreciation and accumulated impairment losses, if any. Depreciation is charged to the consolidated statement of profit and loss account using the straight line method at the rates stated in note 10.1 after taking into account residual values, if any. The residual values, useful lives and depreciation methods are reviewed and adjusted, if appropriate, at each reporting date. Depreciation is charged from the date when the asset is available for use while no depreciation is charged on the date the asset is disposed of.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be reliably measured. All other repair and maintenance expenditure are charged to the consolidated statement of profit and loss account as and when incurred.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gain / loss on disposal of fixed assets is recognised in the consolidated statement of profit and loss account in the period in which disposal is made.

4.8.2 Ijarah assets

ljarah assets are stated at cost less accumulated depreciation and impairment loss (if any). Depreciation is charged to income applying the straight line method whereby the cost of an asset, less its residual value, is written off over its lease period. In respect of additions and disposals during the year, depreciation is charged proportionately to the period of ijarah lease.

4.8.3 Lease liability and right-of-use assets

On initial recognition, right-of-use assets is measured at an amount equal to initial lease liability adjusted for any lease payments made at or before the commencement date, plus any initial costs incurred and an estimate of costs to be incurred to dismantle and remove the underlying asset or the site on which it is located.

Right-of-use assets is subsequently stated at cost less any accumulated depreciation / accumulated impairment losses and are adjusted for any remeasurement of lease liability. The remeasurement of lease liability will only occur in cases where the terms of the lease are changed during the lease tenure.

Right-of-use assets is depreciated over the expected useful lives using the straight-line method. Depreciation on additions (new leases) is charged from the month in which leases are entered into. No depreciation is charged in month in which the leases mature or are terminated.

The lease liabilities are initially measured as the present value of the remaining lease payments, discounted using the interest rate implicit in the lease, or if that rate cannot be readily determined, the Group's incremental borrowing rate.

The lease liability is subsequently measured at amortised cost using the effective interest rate method. The lease liability is also measured to reflect any remeasurement or change in lease terms. These remeasurement of lease liabilities are recognised as an adjustment to the carrying amount of related right-of-use assets after the date of initial recognition.

Each lease payment is allocated between a reduction of the liability and a finance cost. The finance cost is charged to the consolidated statement of profit and loss account as financial charges over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

4.8.4 Capital work-in-progress

Capital work-in-progress is stated at cost less accumulated impairment losses, if any. All expenditure connected with specific assets incurred during the installation and construction / development period is carried under this head. These are transferred to the relevant categories of assets as and when assets become available for use.

4.9 Intangible assets and amortisation

Intangible assets are stated at cost less accumulated amortisation and accumulated impairment losses, if any. Intangible assets are amortised using the straight line method at the rate stated in 12.1. The residual values, useful lives and amortisation methods are reviewed and adjusted, if appropriate, at each reporting date. Amortisation is charged from the date the asset is available for use while no amortisation is charged on the date the asset is disposed of.

Subsequent costs are included in the asset's carrying amounts or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

Gains and losses on disposals, if any, are taken to the consolidated statement of profit and loss account in the period in which these arise.

4.10 Impairment

The adoption of IFRS 9 has fundamentally changed the Group's accounting for impairment losses for financial assets from Prudential Regulations issued by SBP with a forward-looking expected credit loss (ECL) approach. IFRS 9 requires the Group to record an allowance for ECL for all financial assets other than debt instruments classified as FVTPL and equity instruments classified as FVTPL or FVOCI.

4.10.1 Impairment of investments in associates

The Group considers that a decline in the recoverable value of its investments in associates below their cost may be evidence of impairment. Recoverable value is calculated as the higher of fair value less costs to sell and value in use. An impairment loss is recognised when the recoverable amount falls below the carrying value and is charged to the consolidated statement of profit and loss account. Any subsequent reversal of an impairment loss, up to the cost of the investment in associates is credited to the consolidated statement of profit and loss account.

4.10.2 Impairment of non-financial assets (excluding deferred tax)

The carrying amounts of non-financial assets (other than deferred tax asset) are reviewed at each reporting date to determine whether there is any indication of impairment. If such an indication exists and where the carrying value exceeds the estimated recoverable amounts, assets are written down to their recoverable amounts and any resultant impairment losses are recognised immediately in the consolidated statement of profit and loss account.

Impairment losses are reversed if there has been a change in the estimate used to determine the recoverable amounts. Such reversals are only made to the extent that the assets' carrying amounts do not exceed the amounts that would have been determined had no impairment loss been recognised.

4.11 Assets classified as held-for-sale

The Group classifies an asset as held for sale if its carrying amount will be recovered principally through a sale transaction rather than through continuing use. For this to be the case, the asset must be available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such assets and its sale must be highly probable. For the sale to be highly probable, the appropriate level of management must be committed to a plan to sell the asset (or disposal group), and an active programme to locate a buyer and complete the plan must have been initiated. Further, the asset must be actively marketed for sale at a price that is reasonable in relation to its current fair value. In addition, the sale should be expected to qualify for recognition as a completed sale within one year from the date of classification and actions required to complete the plan should indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

A held for sale asset is carried at the lower of its carrying amount and the fair value less costs to sell. Impairment losses are recognised in the consolidated statement of profit and loss account for any initial or subsequent write down of the asset to fair value less costs to sell. Subsequent gains in fair value less costs to sell are recognised to the extent these do not exceed the cumulative impairment losses previously recorded. An asset is not depreciated while classified as held for sale.

4.12 Assets acquired in satisfaction of claims

The Group occasionally acquires assets in settlement of certain advances. These are stated at the lower of the net realisable value of the related advances or the fair value of such assets.

4.13 Taxation

Income tax expense comprises charge for current and prior years and deferred tax. Income tax expense is recognised in the consolidated statement of profit and loss account except to the extent that it relates to items recognised directly in equity in which case it is recognised in equity.

4.13.1 Current

Provision for current taxation is based on taxable income at the current rates of taxation after taking into account tax credits and rebates available, if any. The charge for the current tax also includes adjustments where necessary, relating to prior years which arise from assessments framed / finalised during the year.

4.13.2 Deferred

Deferred tax is recognised using the liability method on all temporary differences between the amounts attributed to the assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is calculated at the tax rates that are expected to be applicable to the temporary differences when these reverse based on the tax rates that have been enacted or substantively enacted as at the reporting date.

Deferred tax assets are recognised for all deductible temporary differences, carry forward of unused tax credits and any unused tax losses to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, carry forward of unused tax credits and unused tax losses can be utilised. The carrying amount of deferred tax asset is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax relating to items recognised in other comprehensive income (OCI) is charged / credited to OCI.

4.14 Borrowings / deposits

Borrowings / deposits are recorded at the amount of proceeds received. The cost of borrowings / deposits is recognised as an expense in the period in which it is incurred. Any difference between the proceeds and the redemption value is recognised in the consolidated statement of profit and loss account over the period of the borrowings / deposits using the effective interest method.

4.15 Staff retirement benefits

4.15.1 Defined benefit plan - Holding Company

The Holding Company operates a funded gratuity scheme for its eligible permanent employees. The liability recognised in the consolidated statement of financial position in respect of defined benefit gratuity scheme is the present value of the defined benefit obligation as at the reporting date less the fair value of plan assets. Contributions to the fund are made on the basis of actuarial recommendations using the Projected Unit Credit Method under which the cost of providing gratuity is charged to the consolidated statement of profit and loss account so as to spread the cost over the service lives of the employees. Valuations are conducted by an independent actuary with the last valuation conducted on December 31, 2023.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period. Past service cost is the change in the present value of defined benefit obligation resulting from a plan amendment or curtailment and is recognised as an expense in the consolidated statement of profit and loss account when the plan amendment or curtailment occurs. Actuarial gains and losses that arise out of experience adjustments and changes in actuarial assumptions are recognised in other comprehensive income with no subsequent recycling through the consolidated statement of profit and loss account.

Defined contribution plan - Holding Company

The Holding Company operates a provident fund scheme for its employees. Equal monthly contributions are made into the Fund both by the Holding Company and the employees at the rate of 10% of basic salary.

4.15.2 Staff retirement benefits of the subsidiaries

Staff gratuity scheme - subsidiaries

AMML and ACRCL operates a funded gratuity scheme where as PLL operates unfunded gratuity scheme for their employees. The liability recognised in the consolidated statement of financial position in respect of defined benefit gratuity scheme is the present value of the defined benefit obligation as at the reporting date less the fair value of plan assets. Contributions to the fund are made on the basis of actuarial recommendations using the Projected Unit Credit Method under which the cost of providing gratuity is charged to the consolidated statement of profit and loss account so as to spread the cost over the service lives of the employees.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period. Past service cost is the change in the present value of defined benefit obligation resulting from a plan amendment or curtailment and is recognised as an expense in the consolidated statement of profit and loss account when the plan amendment or curtailment occurs. Actuarial gains and losses that arise out of experience adjustments and changes in actuarial assumptions are recognised in other comprehensive income with no subsequent recycling through the consolidated statement of profit and loss account.

Staff provident fund - subsidiaries

The Group provides provident fund benefits to its eligible employees. Equal monthly contributions are made to the Fund by the Group and the employees in accordance with the rules of the Fund. The Fund is governed under the Trust Act 1882, Trust Deed and Rules of the Fund, the Companies Act, 2017, Income Tax Ordinance, 2001 and Income Tax Rules, 2002. The Group has no further payment obligation once the contributions have been paid. The contributions either made or due by the Group are recognised as employee benefit expense.

4.16 Provisions, contingent assets and contingent liabilities

Provisions are recognised when the Group has a present, legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

Contingent assets are not recognised and are also not disclosed unless an inflow of economic benefits is probable. Contingent liabilities are not recognised and are disclosed unless the probability of an outflow of resources embodying economic benefits is remote.

4.17 Commitments

Commitments for capital expenditure contracted for but not incurred are disclosed in the consolidated financial statements at committed amounts.

4.18 Revenue recognition

Revenue is recognised to the extent that the economic benefits associated with the transaction will flow to the Group and the amount can be measured reliably.

- Mark-up / return / interest income on advances and investments is recognised on a time proportion basis taking into account effective yield on the instruments except in case of advances and investments classified as non-performing under the SBP's Prudential Regulations on which mark-up / return / interest is recognised on a receipt basis.
- Dividend income is recognised when the Group's right to receive dividend is established.
- Fee, commission and brokerage income and remuneration for trustee and advisory services are recognised when services are rendered.
- Premium or discount on debt securities is amortised using the effective interest method.
- Income from Diminishing Musharakah is recognised on an accrual basis.
- Gains and losses on disposal of assets are recognised in the period in which these arise.
- Return on bank deposits is recognised on a time proportion basis using the effective interest method.
- Rental income is recognised on accrual basis.

4.19 Earnings per share

The Group presents basic and diluted earnings per share (EPS) for its shareholders. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Group by the weighted average number of ordinary shares outstanding during the year. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares, if any.

4.20 Foreign currency translation

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing on the dates of transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated statement of profit and loss account.

4.21 Proposed dividends and transfers between reserves

Dividends declared and transfers between reserves made subsequent to the reporting date are considered as non-adjusting events and are recognised in the consolidated financial statements in the period in which such dividends are declared / transfers are made.

4.22 Segment reporting

A segment is a distinguishable component of the Group that is engaged either in providing product or services (business segment) or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.

The Chief Executive Officer of the Holding Company has been identified as the chief operating decision-maker who is responsible for allocating resources and assessing the performance of the operating segments.

4.22.1 Business segments

Corporate finance

Corporate finance includes services provided in connection with mergers and acquisitions, underwriting, privatisation, securitisation, research, debts (government, high yield corporate bonds, etc.), equity, syndication, initial public offering (IPO) and secondary private placements.

Trading and sales

This includes fixed income, equity, foreign exchange, commodities, credit, funding, lending, repos and brokerage activities.

Commercial banking

Commercial banking includes project finance, real estate, export finance, trade finance, factoring, leasing, lending, guarantees, bill of exchange and deposits.

4.22.2 Geographical segments

The operations of the Group are currently based only in Pakistan.

4.22.3 Scheme of Arrangement

During the period between the effective date (i.e. December 31, 2021) and the order of the High Court of Sindh (i.e. March 02, 2023), the management of the Awwal Modaraba and ACRCL had also issued separate periodic financial statements of each entity to the respective certificate holders / shareholders in compliance of statutory provisions. However, in order to implement the order of the High Court of Sindh (SHC), particularly the effective date of merger, comparative of ACRCL standalone financial statements have been restated to incorporate the effect of merger. Assets and liabilities of Awwal Modaraba merged into ACRCL were subject to their applicable accounting and reporting framework. On merger those assets and liabilities were also subject to International Financial Reporting Standards - 9 'Financial Instruments' (IFRS - 9). The impact of IFRS 9 on these assets and liabilities have been incorporated during the period December 24, 2021 to December 31, 2022 in ACRCL standalone financial statement. The amalgamation is a business combination of entities under common control and therefore scoped out of IFRS-03 'Business Combinations'. Accordingly, predecessor method accounting has been applied from the effective date. Since, assets and liabilities of Awwal Modaraba were already part of group's assets and liabilities, therefore impact on Groups consolidated financial statements due to this merger is impact of IFRS - 9 on assets and liabilities of Awwal Modaraba. Comparatives restated due to this impact have been disclosed below.

Statement of financial position

Stage 1 includes loans and advances that have not had a significant increase in credit risk since initial recognition or that have low credit risk at the reporting date. For Stage 1 loans, 12-month expected credit losses ('ECL') are recognised and interest revenue is calculated on the gross carrying amount of the loan amount. 12-month ECL are the expected credit losses that result from default events that are possible within 12 months after the reporting date.

Stage 2 includes loans and advances where credit risk is higher since initiation or they have had a significant increase in credit risk since initial recognition but that do not have objective evidence of impairment. For these loans, lifetime ECL are recognised, but interest revenue is still calculated on the gross carrying amount of the loan amount. Lifetime ECL are the expected credit losses that result from all possible default events over the expected life of the loans. Expected credit losses are the weighted average credit losses with the probability of default ('PD') as the weight.

9.5

Stage 1 comprises of EAD (principal plus markup) amounting to Rs. 22,628.780 million and ECL of Rs. 81.284 million and stage 2 comprises of EAD amounting to Rs. 568.230 million and ECL of Rs. 24.770 million.

Forced Sale Value (FSV) benefit amounting to Rs. 371.28 million (2022: Rs. 364.074 million) is available with the Group against certain mortgaged properties held as collateral against non-performing advances. However, the same has not been considered while computing credit loss allowance as at year end, as credit loss allowance has been computed under IFRS 9 - Financial Instruments.

| | lotal assets classified as neid-for-sale | | 195,387 | 355 |

15.1 These represent land, building and machinery which have been classified as 'non-current assets as held for sale' as at December 31, 2021. The Company acquired these assets by settling total outstanding principal and mark-up of Rs. 135 million and Rs. 34 million respectively. It is expected that the process of sale of these assets will be completed in the near future.

15.2 Asset Held For Sale Discontinued Operation

On September 30, 2023, the Group publicly announced the decision of its Board of Directors to sell AMML, a wholly owned subsidiary. The sale of AMML is expected to be completed within a year from the reporting date. At December 31, 2023, AMML was classified as a disposal group held for sale and as a discontinued operation. The results of AMML for the year are presented below:

The major classes of assets and liabilities of AMML classified as held for sale as at 31 December are, as follows:

The Company has entered into agreements for financing with the SBP for Long-Term Financing under export oriented projects to customers. According to the terms of the respective agreements, the SBP has the right to receive the outstanding amount from the Company at the due date by directly debiting the current account maintained by the Company with the SBP. The rate of return ranges from 2% to 11% per annum (2022: 2% to 7% per annum). These are secured against demand promissory notes and are repayable within 8 years (2022: 9 years).

- 16.3 These borrowings have been obtained from the SBP under a scheme for financing renewable energy power plants to promote renewable energy projects in the country. These carry mark-up at rates ranging from 2.00% to 5.00% per annum (2022: 2.00% to 5.00% per annum) and are due to mature latest by June 30, 2029. As per the terms of the agreement, the Company has granted the SBP a right to recover the outstanding amount from the Company at the respective date of maturity of finances by directly debiting the current account of the Company maintained with the SBP.
- These represent borrowings from the SBP under scheme for temporary economic refinance facility. The mark-up rate applicable on these facilities is 1% to 2% per annum (2022: 1% per annum) payable on quarterly basis, with maturities up to May, 2032 (2022: May 2032). As per the terms of the agreement, the Company has granted the SBP a right to recover the outstanding amount from the Company at the respective date of maturity of finances by directly debiting the current account of the Company maintained with the SBP.
- These funds have been obtained from the SBP under a scheme for financing the storage of agricultural produce to encourage the private sector to establish silos, warehouses and cold storages. These carry mark-up at rate of 2% to 4% per annum (2022: 2.53% per annum) and are due to be matured by June 02, 2029.
- These represent borrowings from the SBP under scheme for refinance and credit guarantee schemes. The mark-up rate applicable on these facilities is 0% per annum (2022: 0% per annum) payable on quarterly basis, with maturities up to November, 2028 (2022: November, 2027). As per the terms of the agreement, the Company has granted the SBP a right to recover the outstanding amount from the Company at the respective date of maturity of finances by directly debiting the current account of the Company maintained with the SBP.
- 16.7 These represent financing facilities to special persons to meet credit needs for setting up of new business enterprises or for expansion of existing ones and claim refinance from State Bank of Pakistan up to 100% of finance extended by them. The spread is capped at 5% per annum (2022: 5% per annum) by SBP whereas SBP's refinance rate for this facility is 0% per annum (2022: 0% per annum) with maturities up to September 2027. In case of default of the counterparty, up to 60% of principal is covered by SBP. As per the terms of the agreement, the Company has granted the SBP a right to recover the outstanding amount from the Company at the respective date of maturity of finances by directly debiting the current account of the Company maintained with the SBP.
- 16.8 These represent borrowings from the SBP under scheme for working capital facilities. The mark-up rate applicable on these facilities is 2% per annum (2022: 2% per annum) payable on quarterly basis, with maturities up to May 2028. As per the terms of the agreement, the Company has granted the SBP a right to recover the outstanding amount from the Company at the respective date of maturity of finances by directly debiting the current account of the Company maintained with the SBP.
- These represent borrowings from the SBP under scheme for balancing, modernisation and replacement scheme. The markup rate applicable on these facilities is 1% to 2% per annum (2022: 1% to 2% per annum) payable on quarterly basis, with maturities upto June 2029 (2022: April 2028). As per the terms of the agreement, the Company has granted the SBP a right to recover the outstanding amount from the Company at the respective date of maturity of finances by directly debiting the current account of the Company maintained with the SBP.
- 16.10 These represent borrowings from various financial institutions at mark-up rates ranging from 22.07% to 22.11% per annum (2022: 16.09% to 16.10% per annum). Pakistan Investment Bonds and Market Treasury Bills having a face value of Rs. 111,600 million (2022: 10,000 million) and Rs. nil (2022: Rs. 4,000 million) have been given as collateral against these borrowings respectively.
- These borrowings carry mark-up at rates ranging from 21.49% to 23.26% per annum (2022: 15.92% to 17.29% per annum) and are repayable within 4 years (2022: 5 years). These are secured against hypothecation of receivables, PIBs having a face value of Rs. 21.39 billion (2022: Rs. 24.98 billion) and floating charge over term finance certificates having a face value of Rs. 699.78 million (2022: 750 million).

- 22.3.1 In 2009, Burj Bank Limited (formerly Dawood Islamic Bank Limited) filed a legal suit amounting to Rs. 200 million for damages against the Holding Company for alleged non-performance of underwriting commitment in respect of issue of shares at a premium. The legal advisors of the Holding Company are of the opinion that the Holding Company has a strong case and that the matter will most likely be decided in favour of the Holding Company.
- 22.3.2 The returns of income of the Holding Company from tax years 2008 to 2023 had been filed with the tax authorities. From tax year 2008 upto tax year 2020, these returns have been revised and additional tax demands have been raised of which Rs. 782.07 million are outstanding as at December 31, 2023. The matters which have been raised in these demands mainly included allocation of common expenses to dividend income, taxation of discount income, additions on account of concessional loans to employees and deletion of the charge pertaining to the Workers' Welfare Fund. The Holding Company is contesting these demands and appeals have been filed by the Holding Company against the same which are pending adjudication at various legal and appellate forums. The Holding Company has made partial payments against some of these demands which are being shown as refundable from tax authorities (note 13). The management is confident that the matters will eventually be decided in favour of the Holding Company and that the Holding Company will be able to adjust amounts in respect of matters decided against the Holding Company (if any) against the tax refunds currently being claimed by it.

30.1 As a consequence of the 18th amendment to the Constitution of Pakistan, the Sindh Workers' Welfare Fund Act, 2014 (SWWF Act) had been passed by the Government of Sindh in May 2015 as a result of which every industrial establishment located in the Province of Sindh, the total income of which in any accounting year is not less than Rs. 0.50 million, is required to pay Sindh Workers' Welfare Fund (SWWF) in respect of that year a sum equal to two percent of such income. The matter relating to payment of SWWF is pending before the Sindh High Court and an interim stay order has been obtained by the Holding Company and Primus Leasing Limited. However, as a matter of abundant caution, the management has maintained a provision for SWWF in the consolidated financial statements amounting to Rs. 195.882 million which includes a provision of Rs. 32.057 million for the current year.

36 DEFINED BENEFIT PLAN

36.1 General description

As mentioned in note 4.15, the Group operates a funded gratuity scheme whereas PLL operates unfunded gratuity scheme for all its permanent employees. The benefits under the gratuity scheme are payable on retirement at the age of 60 or earlier cessation of service, in lump sum. The benefit is equal to one month's last drawn basic salary for each year of eligible service with the Group subject to a minimum qualifying period of service of five years. The plan assets and defined benefit obligations are based in Pakistan.

36.9.1 Description of risks

The defined benefit plan exposes the Group to the following risks:

Withdrawal risks - This is the risk of higher or lower withdrawal experience than assumed. The final effect could go either way depending on the beneficiaries' service / age distribution and the benefit.

Mortality risks - This is the risk that the actual mortality experience is different. Similar to the withdrawal risk, the effect depends on the beneficiaries' service / age distribution and the benefit.

Investment risks - This is the risk of the investment underperformance and being not sufficient to meet the liabilities.

Final salary risks - This is the risk that the final salary at the time of cessation of service is greater than what was assumed.

36.10 Sensitivity analysis

A sensitivity analysis for each significant financial assumption as of the reporting date, showing how the defined benefit obligation would have been affected by changes in the relevant actuarial assumption that were reasonably possible at that date, is as follows:

| | 2023 | 2022 |
|---|-----------|----------|
| | Rupees in | n '000 |
| Increase / decrease in obligation | | |
| 1% increase in discount rate | 20,649 | 17,114 |
| 1% decrease in discount rate | 15,234 | (18,324) |
| 1% increase in expected rate of salary increase | 15,279 | 18,378 |
| 1% decrease in expected rate of salary increase | 20,657 | 7,504 |

The above sensitivities analyses are based on a change in an assumption while holding all other assumptions constant. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the gratuity liability recognised within the unconsolidated statement of financial position.

Rupees in '000

36.11 Expected contributions to be paid to the fund in the next financial year

9,486

The expected charge for the next financial year commencing January 1, 2024 works out to Rs 9.486 million (2022: 7.033 million).

36.12 Maturity profile

The weighted average duration of the obligation is 8 years (2022: 7.6 years).

36.13 Funding policy

An implicit, though not a formally expressed objective, is that the liabilities under the scheme in respect of members in service on the valuation date on a going concern basis and having regard to projected future salary increases, should be covered by the Fund on the valuation date, the total book reserve as of the valuation date, future contributions to the Fund, future additions to the book reserve and future projected investment income of the Fund.

Accordingly the contribution to the Fund should remain reasonably stable as a percentage of salaries, under the Actuarial Cost Method employed.

37 DEFINED CONTRIBUTION PLAN

The Group operates a provident fund scheme for all its permanent employees. Equal monthly contributions at the rate of 10% per annum (2022: 10% per annum) of basic salaries are made both by the Group and employees. Contributions made to the provident fund during the year are as follows:

| | 2023 Rupees i | 2022 n '000 |
|--------------------------------|------------------|----------------|
| Contribution made by the Group | 11,778 | 9,565 |
| Contribution made by employees | 11,778 | 9,565 |

39 FAIR VALUE MEASUREMENT

The fair value of quoted securities other than those classified as held to maturity, is based on quoted market price. Quoted securities classified as held to maturity are carried at cost. The fair value of unquoted equity securities, other than investments in associates and subsidiaries, is determined on the basis of the break-up value of these investments as per their latest available audited financial statements.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments.

39.1 Fair value of financial assets

The Company measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the assets or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: Fair value measurements using input for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

Valuation techniques and inputs used in determination of fair values

| Item | Valuation techniques and input used |
|---|---|
| Fully paid-up ordinary shares | Fair values of investments in listed equity securities are valued on the basis of closing quoted market prices available at the stock exchange. |
| Pakistan Investment Bonds / Market Treasury Bills | Fair values of Pakistan Investment Bonds and Treasury Bills are derived using the PKRV / PKFRV rates (FMA report). |
| Term finance / sukuks certificates | Investments in listed debt securities (comprising term finance certificates, bonds, sukuk certificates and any other security issued by a company or a body corporate for the purpose of raising funds in the form of redeemable capital) are valued on the basis of the prices announced by the Pakistan Stock Exchange Limited. |

The table below analyses financial instruments measured at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorised:

40.2 Segment details with respect to geographical location

The operations of the Company are currently based only in Pakistan.

41 TRUST ACTIVITIES

The Holding Company has assumed the role of Trustee to various Term Finance Certificates (TFCs) / sukuk issues and is holding trust properties in fiduciary capacity for and on behalf of the trust beneficiaries. The Holding Company is registered as a Debt Securities Trustee (DST) under the Debt Securities Trustee Regulations, 2017 (DST Regulations, 2017) issued by the SECP.

Presently, the Holding Company is acting as Trustee and/or Investment Agent to 52 (fifty-two) debt securities issues of entities, including Agha Steel Industries Limited, Agritech Limited, Azgard Nine Limited, Bank Alfalah Limited, Bank Al-Habib Limited, Bank Islami Pakistan Limited, Crescent Steel & Allied Product Limited, Dubai Islamic Bank Pakistan Limited, Habib Bank Limited, Hub Power Company Limited, Hub Power Holding Pvt. Limited, Jahangir Siddiqui & Co. Limited, JS Bank Limited, K-Electric Limited, Khushhali Microfinance Bank Limited, Neelum Jhelum Hydro Power Co. Limited, Pakistan Intermodals Limited, Pakistan Services Limited, Silk Bank Limited, Sindh Nooriabad Power Co. Limited (Phase-I & II), Soneri Bank Limited, Summit Bank Limited, Telecard Limited, The Bank of Punjab, U Microfinance Bank Limited, and WAPDA (Dasu Hydro Power Project).. The combined value of debt securities as at December 31, 2023 amounted to Rs. 386,774 million (2022: Rs. 404,841 million).

42 RELATED PARTY TRANSACTIONS

The Group has related party relationship with associates, employees' defined benefit and defined contribution plans, its key management personnel and state controlled entities.

There are no transactions with key management personnel other than those carried out as per their terms of employment. Contributions to approved defined benefit and contribution plans are disclosed in notes 36 and 37 to these consolidated financial statements and are made in accordance with the actuarial valuations / terms of scheme. Remuneration to chief executive, directors and executives is disclosed in note 38 to the consolidated financial statements. Transactions with owners have been disclosed in 'Consolidated Statement of Changes in Equity'. All other transactions between the Group and its related parties are carried out under normal course of business except employee staff loans that are as per terms of employment. The details of transactions with related parties during the year and balances with them as at year end, other than those which have been disclosed elsewhere in these consolidated financial statements, are as follows:

In order to strengthen the solvency of Banks / Development Financial Institutions (DFI), SBP through its BSD Circular No. 19 of 2008 dated September 05, 2008 has asked the DFIs to raise their minimum paid up capital to Rs.6 billion free of losses by the end of financial year 2009.

The paid-up capital and CAR of the Group stands at Rs. 6 billion and 26.58% of its risk weighted exposure as at December 31, 2023.

The Group uses Standardised approach for calculations of Credit and Market Risk Weighted Assets while Basic Indicator approach is used to calculate Operational Risk Weighted assets.

The link to the full disclosure is available at https://pakbrunei.com.pk/wp-content/uploads/2023/03/BaselIII2023Disclosure-Consolidated.pdf

44 RISK MANAGEMENT

The Risk Management Framework (the Framework) of the Group provides principles for identifying, assessing and monitoring risk within the Group. The Framework specifies the key elements of the risk management process in order to maximise opportunities, to minimise adversity and to achieve improved outcomes and outputs based on informed decision making.

Categories of risk

The Group generates most of its revenues by accepting credit, liquidity and market risk. Effective management of these risks is the decisive factor in the profitability of the Group. In addition, the Group is subject to certain consequential risks that are common to all business undertakings. These risks are grouped under two headings: operational risk and reputational risk. The Framework is organised with reference to these five risk categories as detailed below:

| Credit risk | This risk is defined as the possibility of loss due to unexpected default or a deterioration of credit worthiness of a counter party. |
|-------------------|---|
| Market risk | The risk of loss generated by adverse changes in the price of assets or contracts currently held by the Group. |
| Liquidity risk | The risk that the Group is unable to meet its payment obligations or fund increases in assets when they fall due without incurring an unacceptable cost the consequences of which may be the failure to meet obligations to repay investors and fulfil commitments to lend. |
| Operational risk | Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, and systems or from external events and includes legal risk. |
| Reputational risk | The risk of failing to meet the standards of performance or behaviour required or expected by stakeholders in commercial activities or the way in which business is conducted. |

Risk responsibilities

The Board of Directors (the Board) is accountable for the overall supervision of the risk management process. The Board is responsible for the approval of all risk policies and ensuring that these are properly implemented. Furthermore, the Board approves the appointment of senior management personnel who are capable of managing the risk activities conducted by the Group.

Risk Management comprises of two areas namely Credit Risk Management (CRM) and Middle Office and Operational Risk (MOOR). CRM oversees credit risk taken by the Group while MOOR function overviews market, liquidity and operational risks of the Group. The functions of both of these units are subject to the policies and manuals approved by the Board, Prudential Regulations and additional regulatory directives issued from time to time. These units are independent of business generation and risk taking. For all credit exposures taken by the Group, CRM prepares a comprehensive credit advice highlighting business, financial and structural risks for Credit Committee members. CRM monitors the credit portfolio of the Group on a regular basis to ensure prudent lending. Moreover, this department also sets parameters for various risks including i) sectoral concentration, ii) exposure limits for single and group exposures, and iii) monitoring watch list accounts and the entire portfolio. The risk management philosophy is to identify and monitor risk on a portfolio basis and assess the risk taking capacity of the statement of financial position as a whole. MOOR is responsible for monitoring and reporting of market and liquidity risk as it arises from our trading, investing and lending activities. MOOR also conducts Risk and Self Assessment exercises and maintains Group wide risk registers to monitor operational risks embedded in the Group operations and ensure that sufficient controls are in place against such risks.

Different Management Committees have been set up to review different kinds of risks; mainly being the Assets and Liabilities Committee (ALCO), Credit Committee (CC) and Risk Management Committee (RMC). Comprehensive risk management manuals have been designed which cover all significant risks including credit, liquidity, market and operational risks and provides guidance to management on risk controls, limits, risk measurement tools and a reporting framework.

44.1 Credit risk

Credit risk, i.e. the potential default of one or more debtors, is the largest source of risk for the Group. The Group is exposed to credit risk through its lending and investment activities. The credit risk arising from exposure to corporates is governed by the Credit Risk Management Policy and Credit Administration Frameworks. The counter party credit risk arising from interbank lines are addressed in the Treasury policy framework. The Group has adopted Standardised Approach of Basel II Accord.

The Group manages 3 principal sources of credit risk:

i) Sovereign credit risk

When the Group lends to public sector borrowers, it prefers obtaining a full sovereign guarantee or the equivalent from the Government of Pakistan (GoP). However, certain public sector enterprises have a well defined cash flow stream and appropriate business model based on which the lending is secured through collaterals other than GoP guarantee.

ii) Non-sovereign credit risk

When the Group lends to private sector borrowers it does not benefit from sovereign guarantees or the equivalent. Consequently, each borrower's credit worthiness is analysed on a standalone basis. Two internal rating models are in use to rate (i) Corporate / Commercial customers (ii) SME customers. Frameworks of both these models have been duly approved by the Board.

iii) Counter party credit risk on interbank limits

In the normal course of its business, the Group's Treasury utilises products such as reverse repos and call lendings to meet the needs of the borrowers and manages its exposure to fluctuations in market interest rates and to temporarily invest its liquidity prior to disbursement. All of these financial instruments involve, to varying degrees, the risk that the counterparty in the transaction may be unable to meet its obligation to the Group.

Reflecting a preference for minimising the exposure to counterparty credit risk, the Group maintains eligibility criteria that link the exposure limits to counterparty credit ratings by external rating agencies. For example, the minimum rating for counterparties to be eligible for a financing relationship with the Group is BBB.

Credit administration

Credit Administration Department is involved in minimising losses that could arise due to security and documentation deficiencies.

Risk analytics

To ensure a prudent distribution of asset portfolio, the Group manages its lendings and investment activities within a framework of Borrower, Group, Product, Geographical and Sector exposure limits and risk profile benchmarks.

Stress testina

The Group also conducts stress testing of its existing portfolio, which includes all assets, i.e., advances as well as investments. This exercise is conducted on a quarterly basis through assigning shocks to distressed / non-performing assets of the Group and assessing its resulting effect on capital adequacy.

Regular monitoring

Regular monitoring of the advances portfolio is carried out which focuses on early problem recognition and influences the front office to carry out an assessment of the borrower's ability to rectify the identified problem / weakness within a reasonable time-frame, consider tighter structuring of facilities, confirm that there are no critical deficiencies in the existing security position and, if possible, arrange for strengthening of the same through obtaining additional collateral. It should however, be noted that these actions are taken prior to incurring overdues on the facility.

Portfolio diversification

While expanding the advances and the investment (TFCs) portfolio, efficient portfolio diversification has been a key consideration despite the relatively small size of operations.

Particulars of the Group's significant on-balance sheet and off-balance sheet credit risk in various sectors are analysed as follows:

44.1.1 Lendings to financial institutions

Credit risk by public / private sector Public / Government Private

44.2 Market risk

The market risk is the risk of reductions in earnings, value and / or reserves arising from changes in market rates (such as interest rates, exchange rates, credit spreads) and market prices (such as commodities, equities, property etc.) as well as their correlations and volatilities. The Group is exposed to market risk primarily through its trading activities, which are centered in the Treasury and Capital market groups.

The Group classifies its assets in banking and trading books as per instructions from the SBP. The Group's trading book comprises positions in financial instruments held with trading intent or in order to hedge other elements of the trading book and free of any restrictive covenants on their tradability. In addition, positions need to be frequently and accurately valued and the portfolio should be actively managed. The positions which do not fulfil the criteria of trading book falls under the banking book and are treated as per SBP requirements.

The Group's trading book consists of investments in government securities, listed equities and mutual funds. The Group actively measures, controls and manages market risk in its trading book on a day-to-day basis. Controls are applied to all investment portfolios by setting limits to the exposures taken. This includes stop loss limits on shares in 'Held-for-trading' portfolio, individual and sectoral concentration limits, volatility and value-at-risk limits, etc.

The Group measures market risk using various techniques like duration analysis for interest rate risk in banking book, Value-at-Risk for adverse price movement, sensitivity analysis for investment in government securities, stress testing, etc. The results are communicated to ALCO and Risk Management Committee on monthly and quarterly basis respectively. Results are also communicated to the Board of Directors every quarter and to Board's Risk Management Committee on a half-yearly basis. Market risk is effectively managed at the portfolio level. The Group has adopted Standardised Approach of Basel II Accord.

44.2.3 Equity position risk

Equity position risk is the risk that the fair value will fluctuate as a result of changes in prices of individual stocks or the levels of equity indices. The Group's equity investments are either classified as fair value through Other Comprehensive Income (FVOCI) or fair value through profit or loss account (FVPL). The objective of the fair value through OCI portfolio is to maintain a medium term view of capital gains and dividend income while the Group takes advantage of short-term capital gains through its fair value through profit or loss (FVPL) portfolio investments. It is managed by the Group through its internal investment policy which is duly approved by the Board. The policy defines various position limits, portfolio limits and stop loss limits for the equity desk. The Group also applies stress tests on the equity portfolio which is part of the Group's overall market risk exposure limit on the banking book.

44.2.4 Yield / interest rate risk in the banking book (IRRBB) - Basel II Specific

Yield / interest rate sensitivity position for on-balance sheet instruments is based on the earlier of contractual re-pricing or maturity dates and for off-balance sheet instruments is based on settlement dates. This also refers to the non-trading market risk. Apart from the gap analysis between the market rate sensitive assets and liabilities as per the table given below, the Group also conducts interest rate sensitivity analysis in the banking book using the Duration Gap analysis based on its interest rate sensitive assets and interest rate sensitive liabilities. The Group also uses parallel shift in interest rates to determine the impact of adverse rate changes on investments in government securities.

- Interest rate sensitivity of assets and liabilities is measured based on actual re-pricing / maturity behaviour of all interest rate sensitive assets and liabilities.
- Duration GAP is calculated based on interest rate re-pricing of assets and liabilities and is used to determine impact of
 adverse interest rate movements on the Group's equity. Such an analysis is conducted every month and results are
 reported to the ALCO and RMC on a monthly and quarterly basis respectively.

44.3 Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events.

The Group, like all financial institutions, is exposed to many types of operational risks, including the potential losses arising from internal activities or external events caused by breakdowns in information, communication, physical safeguards, business continuity, supervision, transaction processing, settlement systems and procedures and the execution of legal, fiduciary and agency responsibilities.

The Group maintains a system of internal controls designed to keep operational risk at appropriate levels, in view of the Group's financial strength and the characteristics of the activities and market in which it operates. These internal controls are periodically updated to conform to the industry's best practices. The Group also gathers operational risk losses to determine strengths and sufficiency of its internal controls.

The Group has developed a Business Continuity Plan applicable to all its functional areas and the plan is rehearsed at least twice in a year.

Furthermore, the Group's operations are relatively simple as compared to a large scale commercial bank. The Group only operates with its head office in Karachi with a liaison office in Lahore. Given simple operations and small scale, Group uses Basic Indicator Approach (BIA) to determine capital charge under Basel II.

44.4 Liquidity risk

Liquidity risk is the risk that the Group is unable to fund its current obligations and operations in the most cost efficient manner. ALCO is the forum to oversee liquidity management.

Liquidity risk can arise from the Group's activities and can be grouped into three categories:

- Inflows / outflows from on-balance sheet items (other than marketable securities and wholesale borrowings) and offbalance sheet items;
- Marketability of trading securities; and
- Capacity to borrow from the wholesale markets for funding as well as trading activities.

The Group's main funding source is the inter-bank money market. Changes in the government monetary policy and market expectations of interest rate are all important factors that can adversely affect our key funding sources. Efficient and accurate planning plays a critical role in liquidity management. The Group's MIS provides information on expected cash inflows / outflows which allows the Group to take timely decisions based on future requirements. The Group monitors all the possible sources from which liquidity risk can emanate including market reputation, borrowing terms, deterioration in quality of credit portfolio, etc. Other sources are also identified for which early warning indicators have been created and are being monitored for early intervention of management sensing a potential liquidity crunch.

Gap analysis and stress testing is done on a periodic basis to capture any adverse effect of market movements on liquidity position. Based on the results produced, ALCO devises the liquidity management strategy to maintain sufficient liquidity to deal with any related catastrophe.
